## L'azienda | The company

Siamo una realtà affermata del design italiano con venticinque anni di storia e in crescita costante. Design, tecnologia e sartorialità sono da sempre gli strumenti con cui portiamo nelle case l'eccellenza del made in Italy. Alla base delle nostre collezioni di accessori e termoarredi per il bagno ci sono la volontà di innovare, un'estetica raffinata e il carattere elegante e deciso di forme che incontrano materiali nobili, raramente impiegati nel nostro settore.

Una visione dell'abitare proiettata nel futuro ci porta tutti i giorni a interpretare le esigenze dei clienti ai quali offriamo prodotti di design o classici sempre customizzabili. Assicuriamo attenzione, dinamicità e tempi certi di fabbricazione e consegna. Futuro e tradizione, design e alta manifattura s'incontrano nei nostri stabilimenti per trasformarsi nel calore e nel comfort delle vostre case.

We are an established reality of Italian design with twenty-five years of history and in constant growth. Design, technology and tailoring have always been the tools with which we bring home the excellence of Made in Italy. At the base of our collections of bathroom accessories and radiators are the desire to innovate, a refined aesthetic and the elegant and strong character of shapes that meet noble materials rarely used in our sector.

A vision of living projected into the future leads us every day to interpret the needs of customers to whom we offer design products or classics that are always customizable. We assure attention, dynamism and certain manufacturing and delivery times. Future and tradition, design and high craftsmanship meet in our factories to transform into the warmth and comfort of your homes.

## Il made in Italy e la sartorialità | Made in Italy and tailoring

La nostra filiera è interamente italiana. Fabbrichiamo negli stabilimenti di Prato, in Toscana, tutti i componenti delle collezioni e ci rivolgiamo a fornitori e a partner attivi nel resto del Paese. Il made in Italy è per noi un valore e la chiave per adattare i nostri prodotti a qualsiasi esigenza, fino a realizzare accessori dedicati, pensati per progetti e allestimenti esclusivi e di grande scala, realmente tailor made.

Il segreto della qualità Caos è inscritto nel nostro know-how che sposa il saper fare artigianale con le tecnologie più all'avanguardia, la tradizione italiana delle manifatture storiche con quella delle macchine.

Our supply chain is entirely Italian. In our factory in Prato, Tuscany, we manufacture all the components of the collections and we turn to suppliers and partners active in the rest of the country. Made in Italy is a value for us and the key to adapting our products to any need, to create dedicated accessories, designed for exclusive and large-scale projects and installations, truly tailor-made.

The secret of Caos's quality is inscribed in our know-how that combines the artisan know-how with the most advanced technologies, the Italian tradition of historical manufacturing with that of machines.

## Tecnologie | Technologies

Nei nostri stabilimenti sono attive sei macchine a controllo numerico in grado di garantire il meglio che la tecnologia contemporanea può offrire all'industria dell'arredamento.

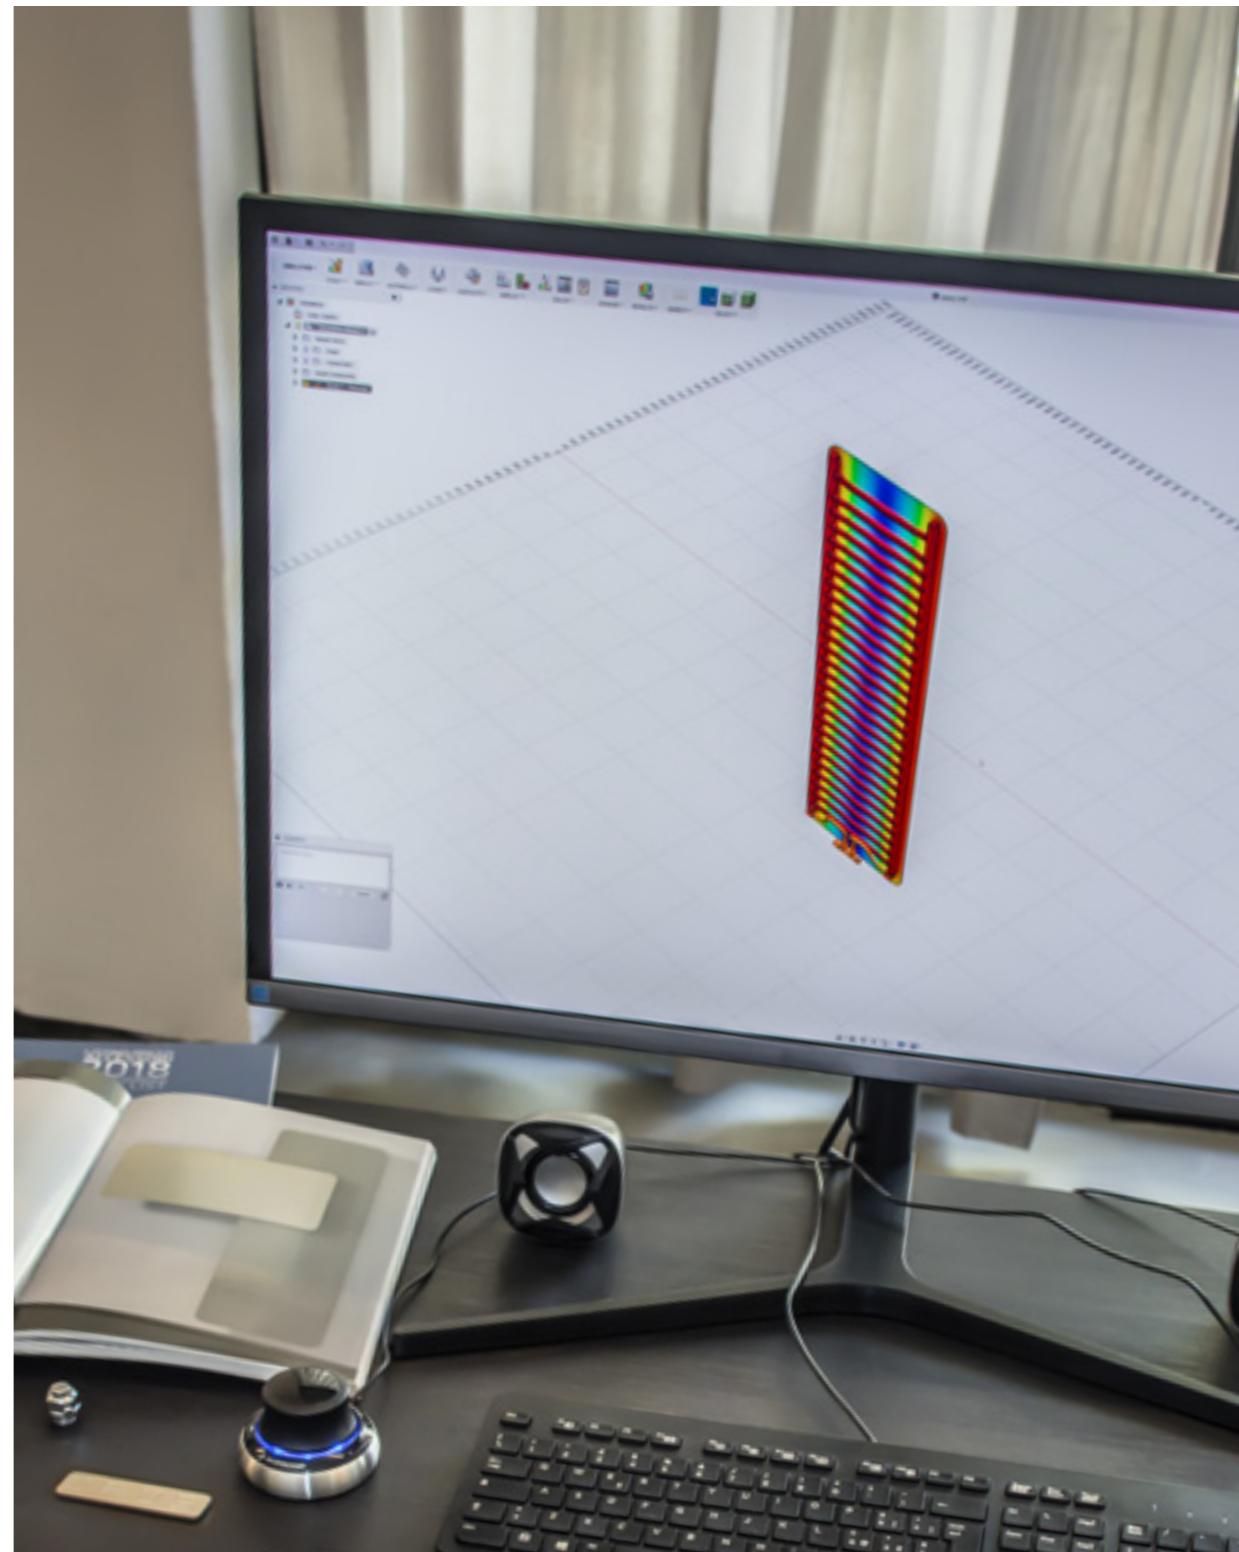

Tornitrici e fresatrici spalancano un mondo di possibilità produttive ed esaltano la nostra progettualità e la cura che mettiamo in ogni dettaglio. Lavorazioni delicate e complesse come la sottrazione di materiale sono compiute nelle nostre fabbriche in tempi brevi e con grande perizia, così come le operazioni di finitura su superfici continue.

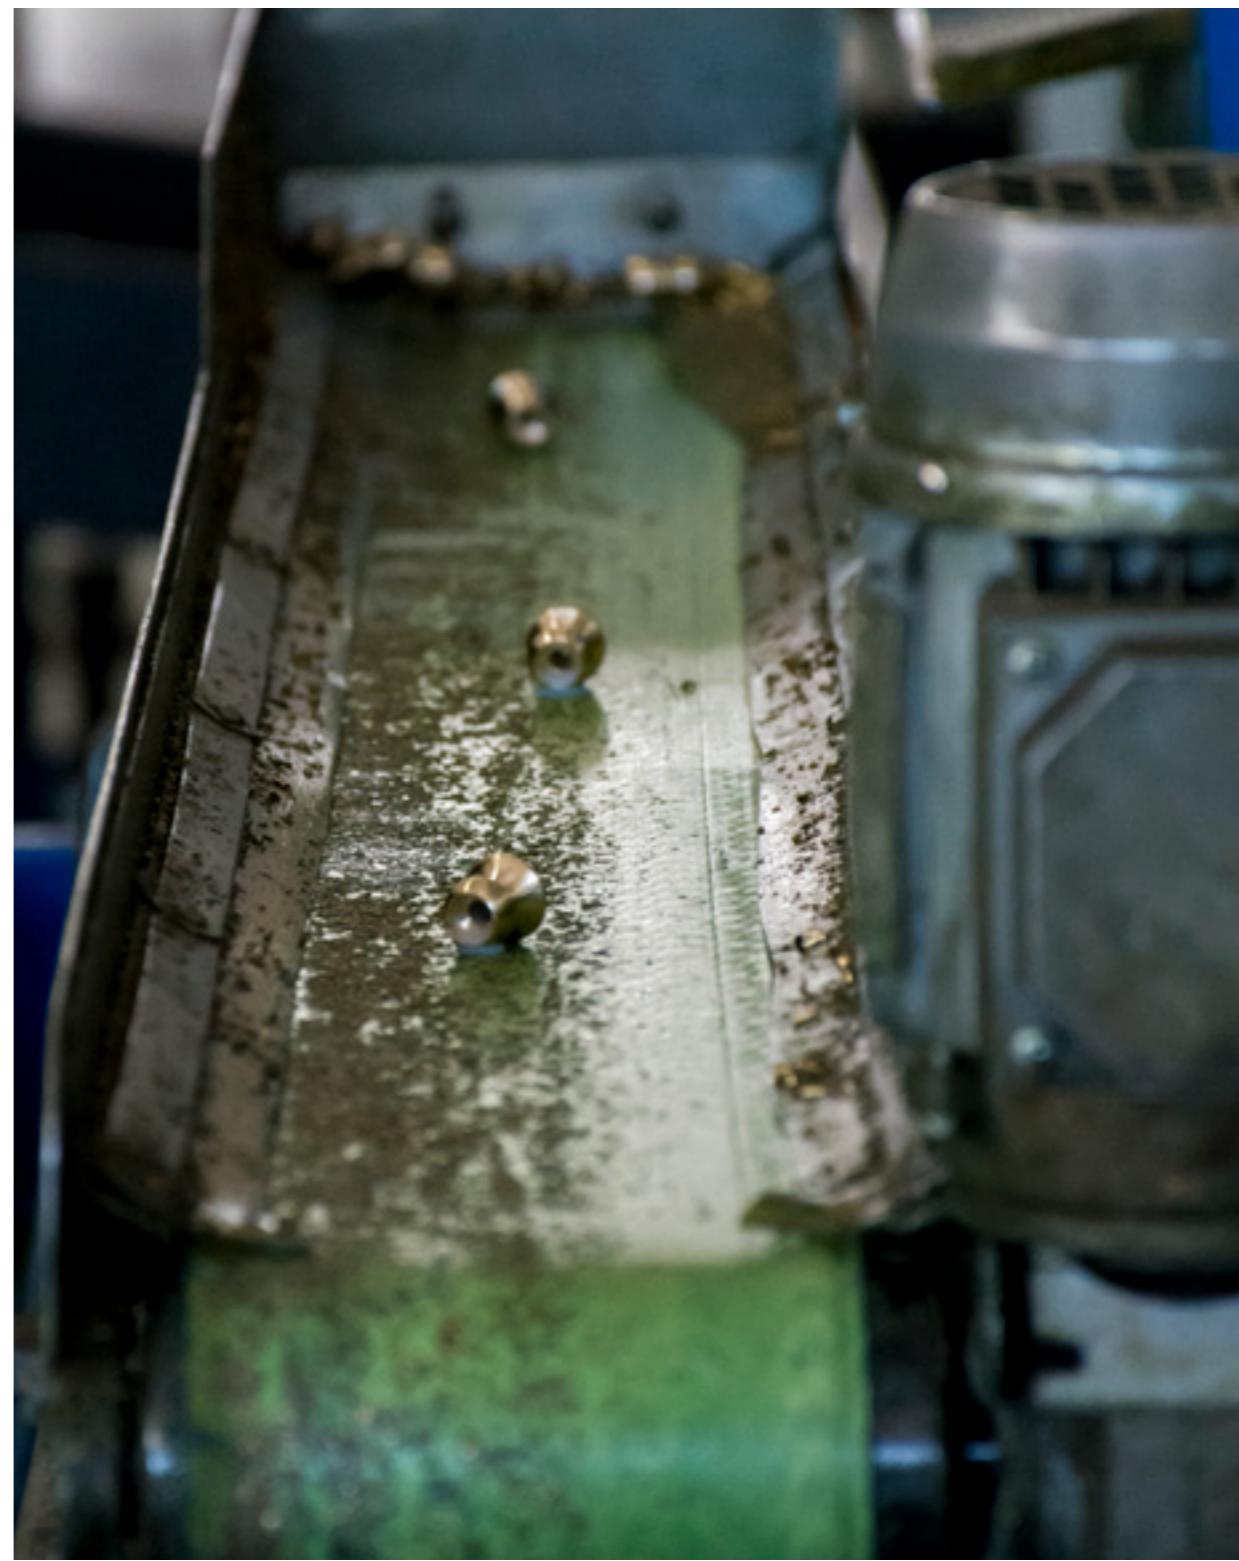

Guidate dai nostri tecnici specializzati, le macchine assicurano la precisione e la sartorialità che contraddistinguono gli accessori e i termoarredi Caos.

In our factory there are six numerical control machines in operation that guarantee the best that contemporary technology can offer to the furniture industry.

Turners and milling machines open up a world of production possibilities and enhance our planning and the care we put into every detail. Delicate and complex operations such as the removal of material are carried out in our factory in a short time and with great skill, as well as finishing operations on continuous surfaces.

Guided by our specialized technicians, the machines ensure the precision and tailoring that characterize the accessories and Caos radiators.

## Artigianato 2.0 | Craftwork 2.0

La cura del dettaglio, apprezzabile nelle forme e nelle finiture, esalta la sapienza e la manualità dei nostri operatori qualificati, abili a imprimere sui prodotti i segni di una tradizione che arriva da lontano, dalla storia secolare delle botteghe rinascimentali che proprio in Toscana ha raggiunto la sua massima espressione.

I nostri artigiani lavorano alla saldatura dell'ottone con l'argento. Dalle loro mani passano materiali nobili che trasformano in un momento di alta manifattura ciò che dai competitor è semplice routine e gesto meccanico, personalizzando ogni prodotto rendendolo perfetto per le esigenze e il gusto dei clienti, superando i vincoli e i limiti della produzione industriale. In un binomio consolidato, artigianato e tecnologia realizzano in Caos un esempio perfetto di industria 4.0.

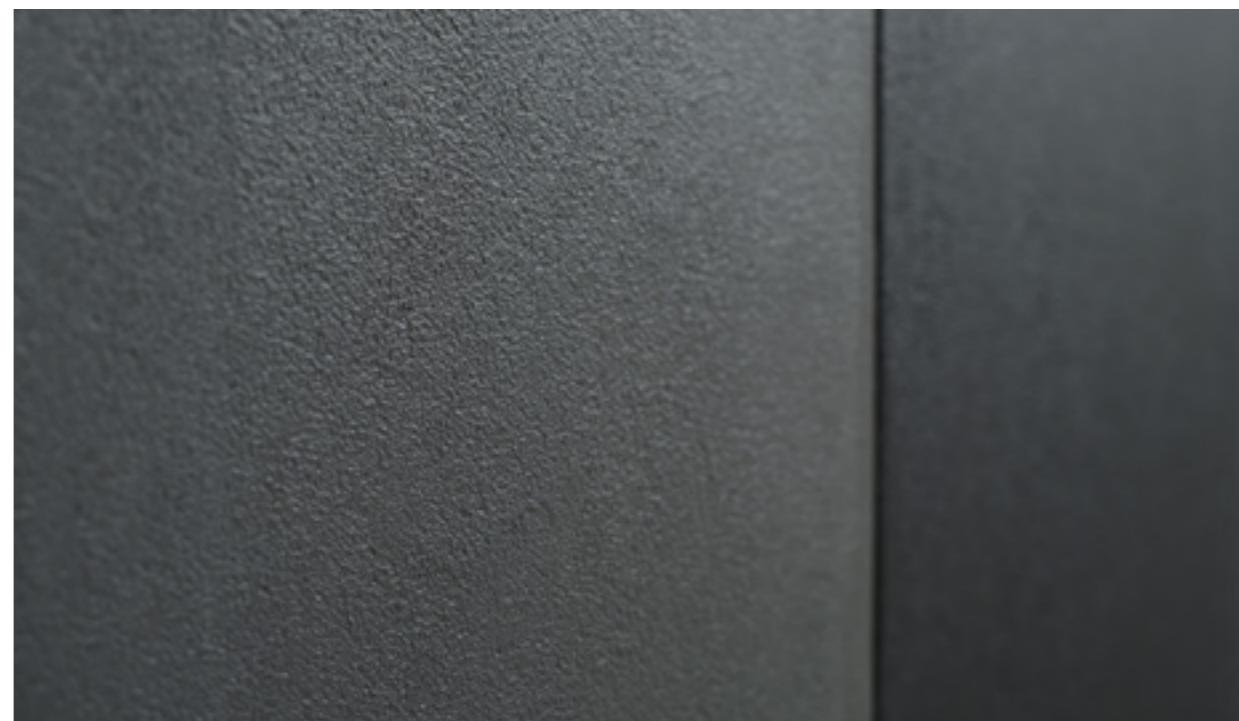

Attention to details, appreciable in the forms and finishes, enhances the wisdom and the dexterity of our qualified operators, able to impress on the products the signs of a tradition that comes from afar, from the centuries-old history of the Renaissance shops that reached in Tuscany its maximum expression.

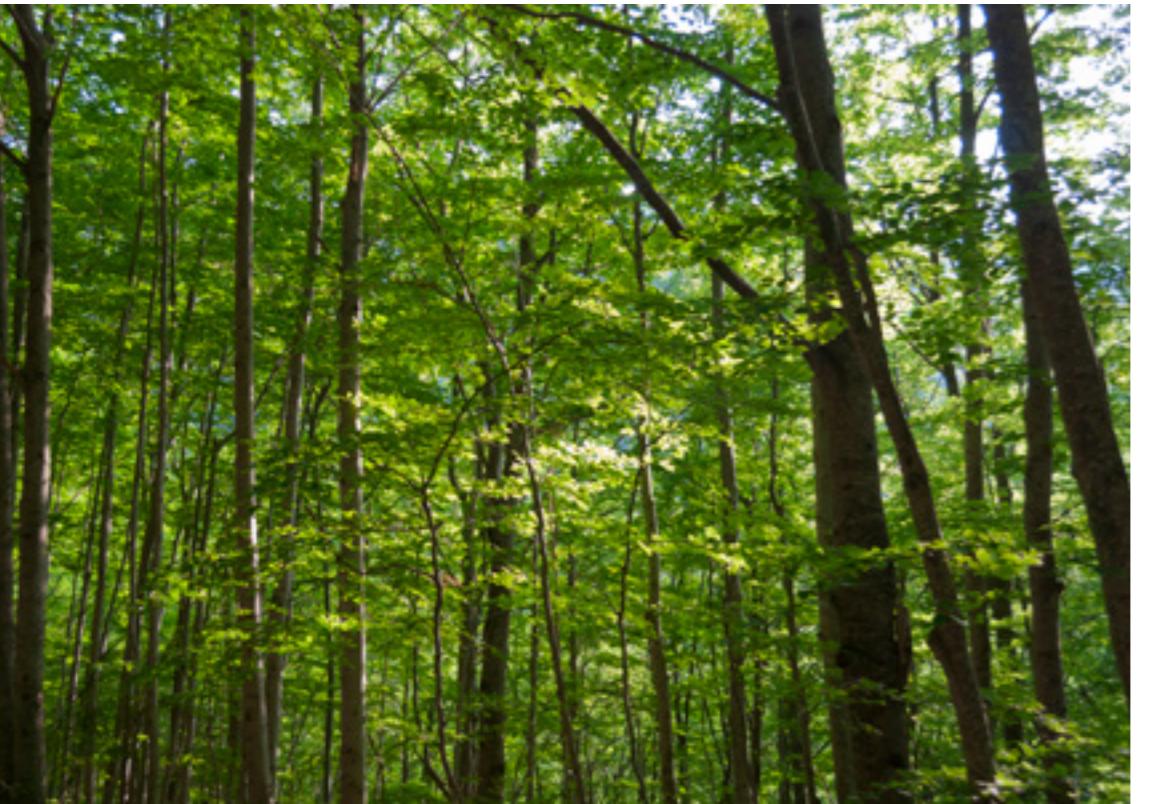

Our artisans work on welding brass with silver. From their hands pass noble materials that transform in a moment of high manufacturing what for other brands is simple routine and mechanical gesture, personalised each product making it perfect for the needs and taste of the customers, overcoming the constraints and limits of industrial production. In Caos, a consolidated combination of craftsmanship and technology create a perfect example of industry 4.0.

## Materiali | Materials

L'ottone saldato con l'argento è il materiale principe dei nostri accessori e termoarredi e uno dei loro massimi valori aggiuntivi. Le collezioni tubolari Caos sono di qualità eccellente perché realizzate proprio in ottone, un metallo che, a differenza dell'acciaio comunemente utilizzato dai competitor, assicura una resa termica maggiore e più veloce e non si corrode nel tempo. Allo stesso modo, i pannelli radianti frontali in alluminio permettono una rapida diffusione del calore in maniera uniforme su tutta la superficie. Le finiture sono un'ulteriore occasione per apprezzare il nostro know how e l'attitudine all'innovazione, alla raffinatezza e al soddisfacimento di un ventaglio il più ampio possibile di gusti, a partire dalla classica cromatura passando per le finiture galvaniche di alto livello fino alla doratura con vero oro, alla satinatura, alla verniciatura a polveri polimeriche con rivestimento nanoceramico ad altissima resistenza e alla foglia oro e argento. La nostra attenzione all'ambiente ci fa poi ricorrere all'ecomalta, un materiale ecologico privo di calce, cemento e resine epossidiche, fatto con inerti provenienti per il 40 per cento da riciclo certificato.

The brass welded with silver is the main material of our accessories and radiators and one of their main added values. The Caos tubular collections are of excellent quality because they are made in brass, a metal that, unlike steel commonly used by competitors, ensures a higher and faster heat output and does not corrode over time. Likewise, the frontal aluminium radiant panels allow a rapid spread of heat evenly over the entire surface. The finishes are a further opportunity to appreciate our know-how and aptitude for innovation, refinement and the satisfaction of the widest possible range of styles, starting from the classic chrome plating up to the high level galvanic finishes, to the gilding with real gold, the satin finishing, the polymeric powder coating with very high resistance nanoceramic pigments and to the gold and silver leaf. Our attention to the environment also makes us resort to the ecomalta, an ecological material without lime, cement and epoxy resins, made with inert materials coming for 40 percent from certified recycling.

## Sostenibilità | Sustainability

Il rispetto dell'ambiente, più che un obiettivo, è per noi un'ossessione. In Caos la sostenibilità è un concetto che si traduce nell'impiego di materiali riciclabili, nella propensione alla monomatericità e in un metodo progettuale che facilita la separazione rapida degli scarti, in linea con gli standard internazionali del Life Cycle Assessment.

Respect for the environment, rather than an objective, is an obsession for us. In Caos, sustainability is a concept that translates into the use of recyclable materials, the propensity to monomateriality and a design method that facilitates rapid separation of waste, in line with international standards of the Life Cycle Assessment.

## Certificazioni | Certifications

La resa termica dei termoarredi Caos è certificata dal Laboratorio Misure Ricerche Termometriche del Dipartimento di Energia del Politecnico di Milano, massimo organismo in Italia e laboratorio di riferimento per le norme EN - ISO. Il laboratorio, oltre a determinare la potenza termica effettiva, effettua prove di tenuta a pressione e perdita di carico.

The thermal efficiency of the Caos radiators is certified by the Thermometric Research Measurements Laboratory of the Department of Energy, Politecnico di Milano, the maximum agency in Italy and reference laboratory for EN - ISO standards. The laboratory, in addition to determining the actual thermal power, carries out pressure and pressure loss tests.

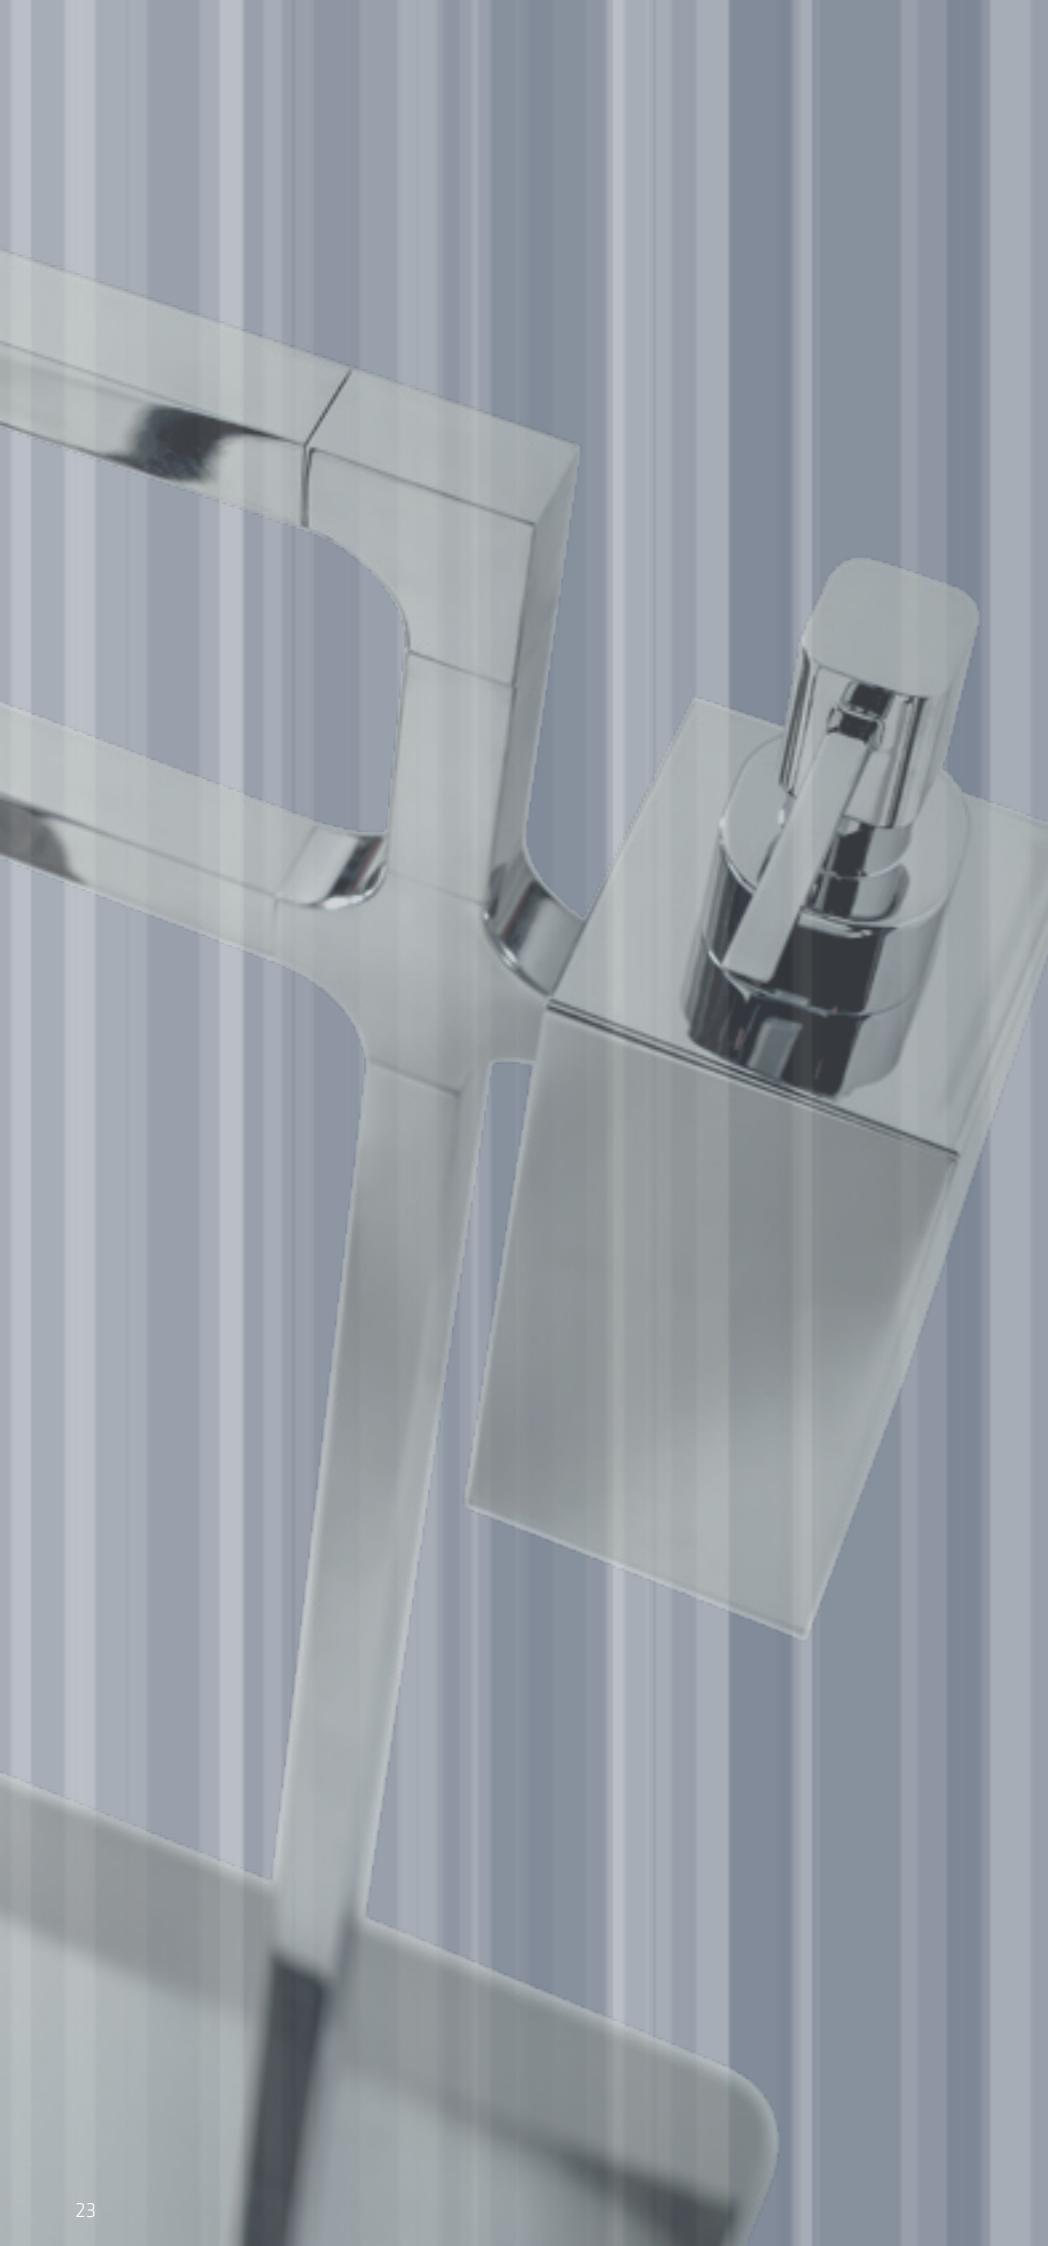

## Comunicazione | Advertising

Investiamo sulla visibilità e promuoviamo le nostre collezioni e la nostra immagine attraverso campagne pubblicate dalle migliori riviste di settore, sul web e sui social media. Design, qualità e innovazione sono le parole chiave che trasmettiamo al nostro pubblico, agli addetti ai lavori e ai professionisti. La comunicazione è l'ultima e strategica tessera di un mosaico che testimonia una storia di eccellenza: quella che inizia nella nostra fabbrica e finisce in casa vostra.

We invest in visibility and promote our collections and our image through campaigns published by the best sector magazines, on the web and on social media. Design, quality and innovation are the key words we convey to our public and professionals. Communication is the last and strategic piece of a mosaic that bears witness to a history of excellence: those that begin in our factory and end in your home.

*"La semplicità riguarda il sottrarre ciò che è ovvio e l'aggiungere ciò che ha senso".*

John Maeda

*"Simplicity is about subtracting what is obvious and adding what makes sense".*

John Maeda

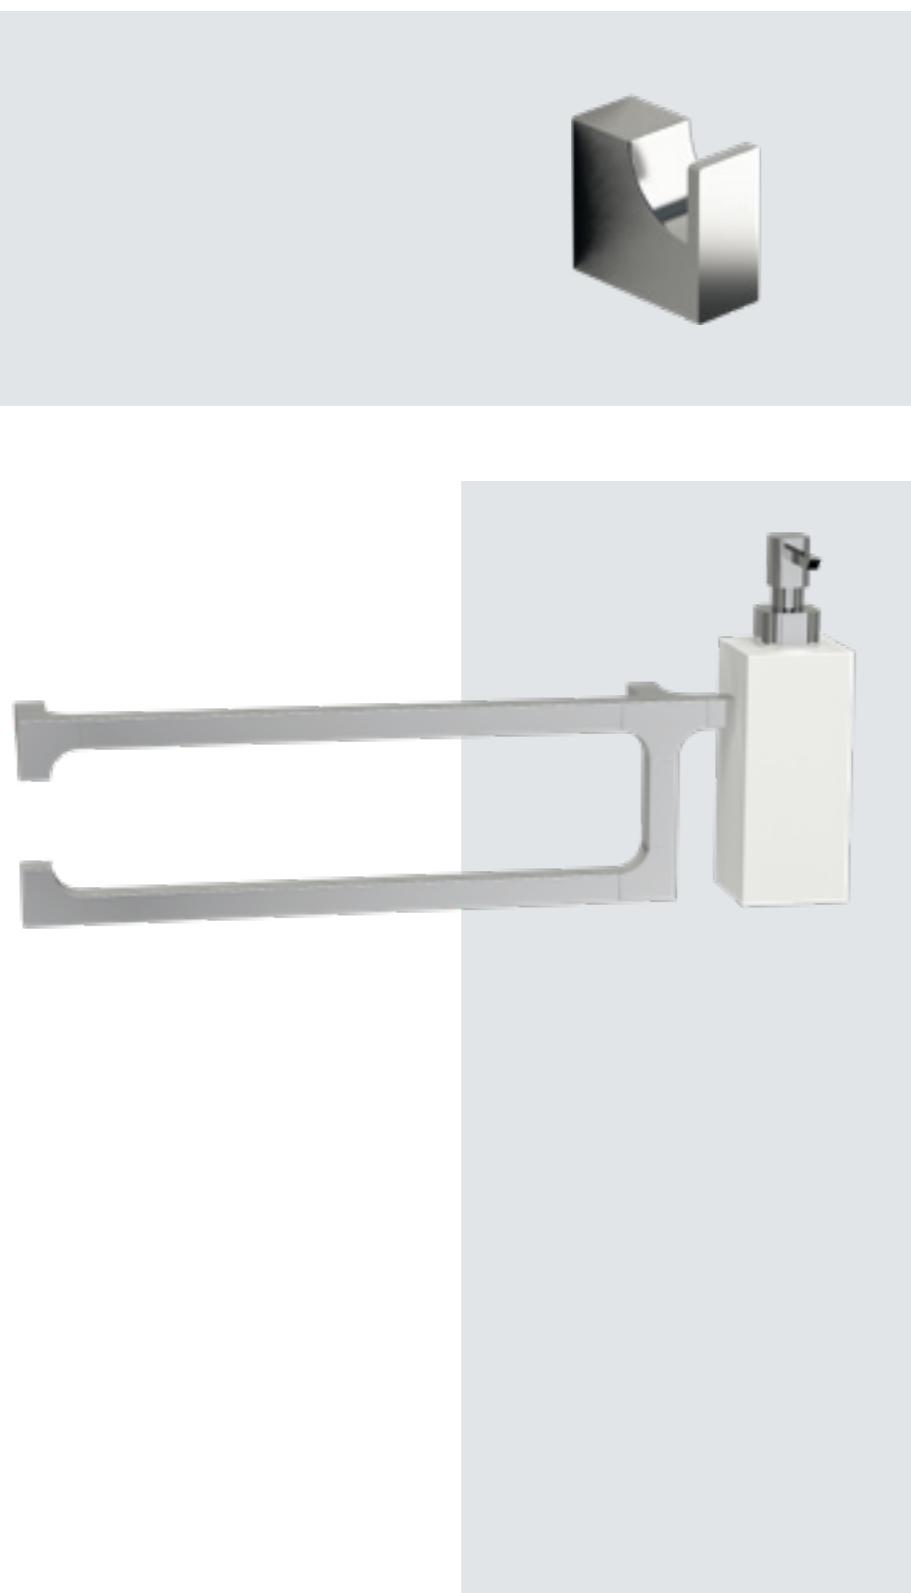

## NODE

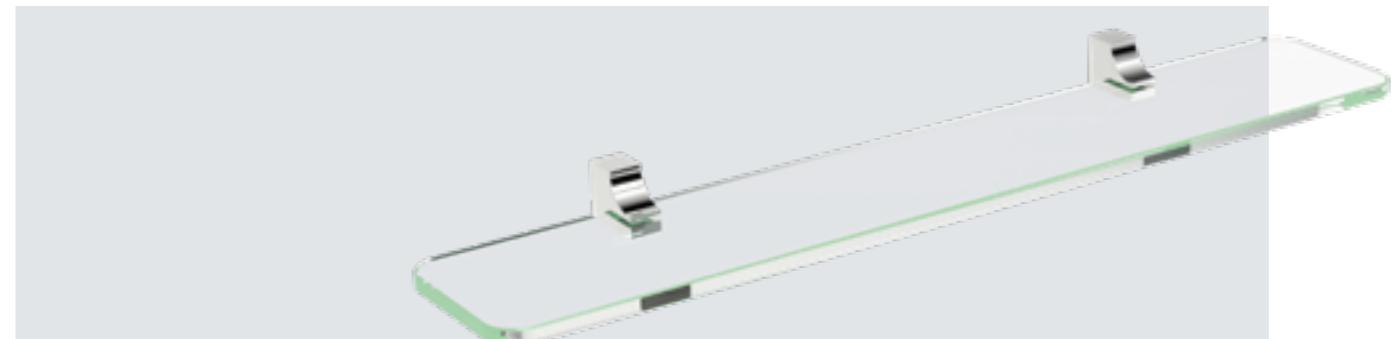

Node, nei suoi snodi essenziali e caratterizzanti, è un'idea progettuale unica e condivisa da tutti gli elementi della linea. Attraverso il sistema di giunzioni, le trame metalliche incorniciano il variare dei volumi, resi vivi dalla materia e dal colore. Un sistema modulare che si sviluppa in un'ampia proposta e dà vita a soluzioni estetiche e funzionali all'avanguardia.

Node, in its essential and characterizing junctions, is a unique design idea shared by all the elements of the line. Through the system of joints, the metal textures frame the varying volumes, brought to life by the material and color. A modular system that develops into a broad proposal gives life to cutting-edge aesthetic and functional solutions.

# CÓLORA

Design Paolo D'Arrigo

*Quadrare il cerchio con i colori*

*Square the circle with colors*

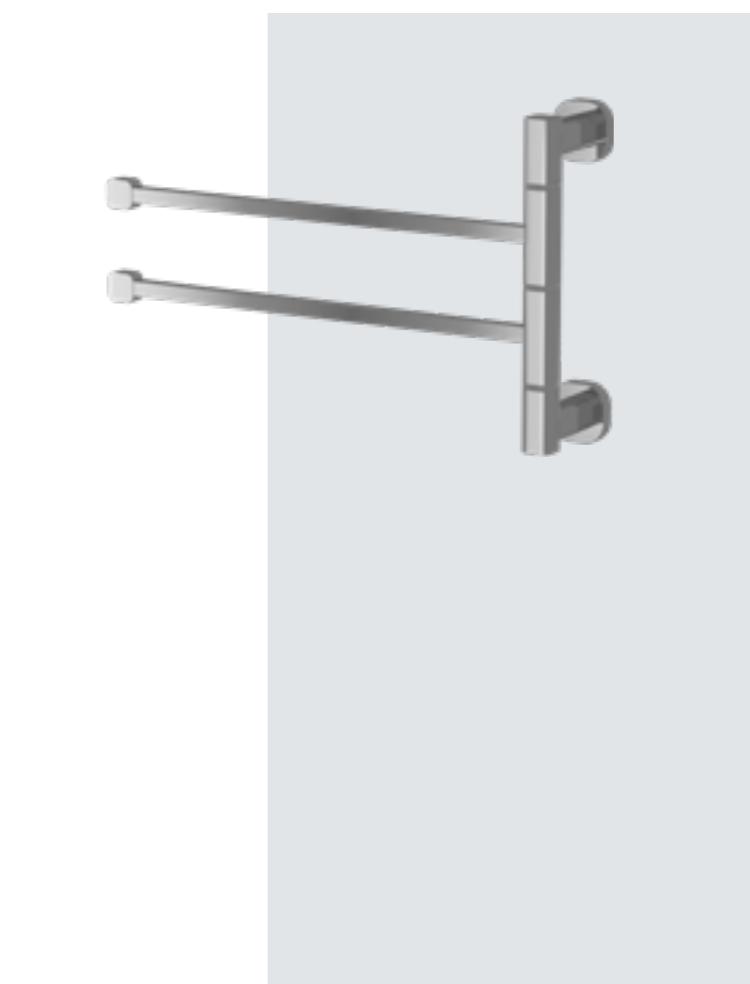

La collezione Cólora, vivace e versatile, dalle linee pulite e moderne, dona all'ambiente bagno un effetto tattile 'caldo', declinandosi nei colori bianco e nero, grigio e sabbia opachi, neutro, ambra, rosso e blu semitrasparenti con finitura satinata. Il sistema modulare delle varie componenti inoltre lo rende adatto alle molteplici necessità.

The Cólora collection, lively and versatile, with clean and modern lines, gives the bathroom environment a 'warm' tactile effect, declining in white and black, gray and sand opaque, neutral, amber, red and semitransparent blue with a satin finish. The modular system of the various components also makes it suitable for multiple needs.

## QUAD

Un minimalismo essenziale, esaltato da materiali nobili. Estetica e funzionalità si mescolano in un unicum dato dal versatile incastro a 45 gradi tra gli elementi. Soluzioni semplici nelle linee, pratiche nell'utilizzo e con un tocco di colore che caratterizza ulteriormente l'ambiente bagno.

An essential minimalism, enhanced by noble materials. Aesthetics and functionality are mixed in a unicum given by the versatile 45 degree joint between the elements. Simple solutions in lines, practical in use and with a touch of color that further characterizes the bathroom.

# MIDÒ

Design Ufficio progetti CAOS

*L'accento sul tuo design*

*Emphasis on your design*

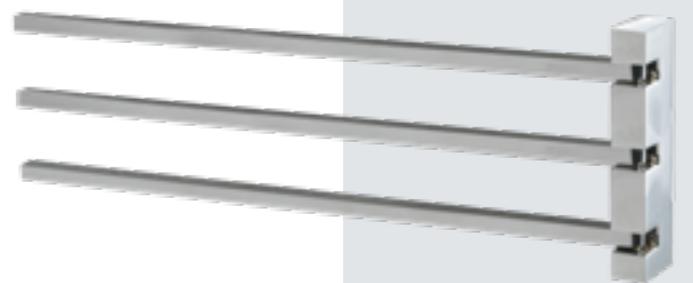

## MIDÒ

Caratterizzata da un giovane "accento", che, con freschezza e versatilità si ripercorre per tutta la serie, Midò è una collezione sospesa, leggera, che mette in relazione in un perfetto equilibrio il rigore del metallo con la purezza della ceramica.

Characterized by a young "accent", which, with freshness and versatility, runs through the whole series, Midò is a suspended, light collection that brings together in a perfect balance the rigor of metal with the purity of ceramic.

*The class is revealed  
in the memory*

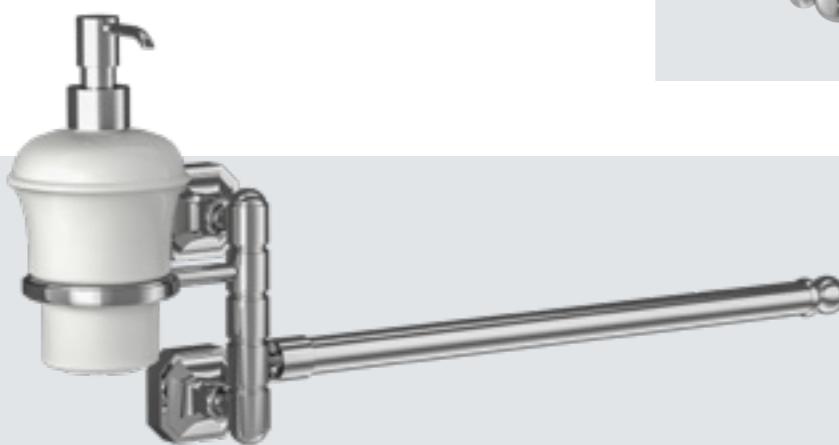

# EMOZIONI

Uno stile neoclassico, una modernità che si lega al canonico equilibrio delle forme, interpretate in chiave moderna. Questi gli assunti di Emozioni, una collezione che svela le sue particolarità a poco a poco, differenziandosi grazie alle declinazioni materiche in ceramica.

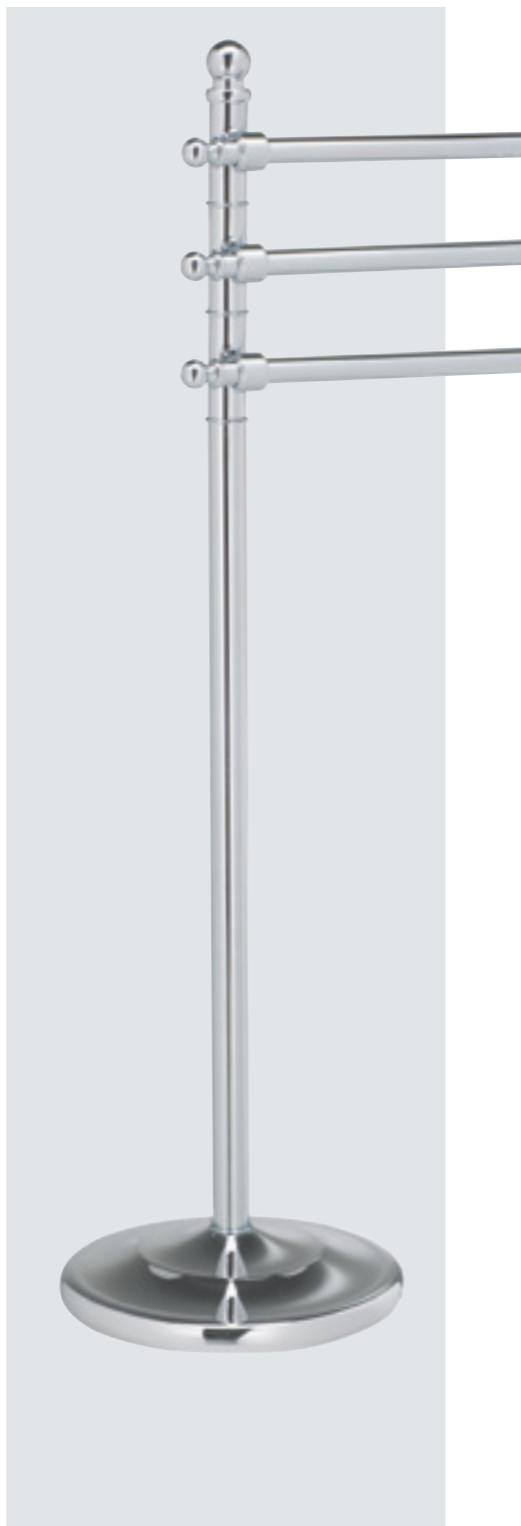

A neoclassical style, a modernity that is linked to the canonical balance of forms, interpreted in a modern key. These are the assumptions of Emozioni, a collection that reveals its peculiarities little by little, differentiating itself thanks to the material variations in ceramic.

# INCOLLO SYSTEM

## Istruzioni per l'uso | Instruction for use

In collo System permette il montaggio degli accessori a muro laddove non è possibile o non si vuole rovinare la parete del bagno.  
Il pratico sistema è facile da installare ed altrettanto semplice da rimuovere, assicurando in ogni caso un ottimo risultato estetico.  
With Adhesive System accessories can be mounted whenever we cannot or don't want to drill in the bathroom wall.  
This practical system is as easy to mount as to remove, assuring in any case an excellent result.

Pulire accuratamente la superficie  
Clean the surface thoroughly

Togliere la protezione del biadesivo  
Remove the double-sided adhesive protection

Applicare il gel adesivo nella parte centrale  
Apply the adhesive gel in the central hole of the double-sided adhesive

Fissare l'accessorio al muro  
Attach the accessory to the wall

Attendere 24h per l'utilizzo  
Wait 24 hours for use

Per rimuovere utilizzare una spatola  
To remove use a spatula

NB: da utilizzare su superfici lisce (ceramiche e marmi), non utilizzare su pareti intonacate.  
NB: to be used on smooth surfaces (ceramic and marble), do not use on plastered walls.

C A O S  
Arredobagno Italiano

Smart Heat è il nuovo sistema CAOS per la gestione del comfort domestico che rende i tuoi termoarredi più efficienti e ti permette di risparmiare sui consumi energetici per il riscaldamento senza rinunciare alla libertà di vivere la tua casa al meglio.

Grazie alla sua interfaccia facile ed intuitiva, la nostra APP esclusiva consente ampia libertà di gestione del termoarredo direttamente da smartphone o tablet su sistemi operativi Android e iOS.

Consente di impostare orari di accensione e spegnimento su base giornaliera e settimanale, personalizzare la velocità di riscaldamento, le temperature desiderate, fino alla gestione cromatica dell'interruttore luminoso RGB.

Smart Heat is the new CAOS system for managing home comfort that makes your radiators more efficient and allows you to save on energy consumption for heating without giving up the freedom to experience your home to the fullest.

Thanks to its easy and intuitive interface, our exclusive APP allows ample freedom to manage the radiator directly from smartphone or tablet on Android and iOS operating systems.

It allows you to set on and off times on a daily and weekly basis, customize the heating speed, the desired temperatures, up to the chromatic management of the RGB light switch.

# CORAL

Design Paolo D'Arrigo

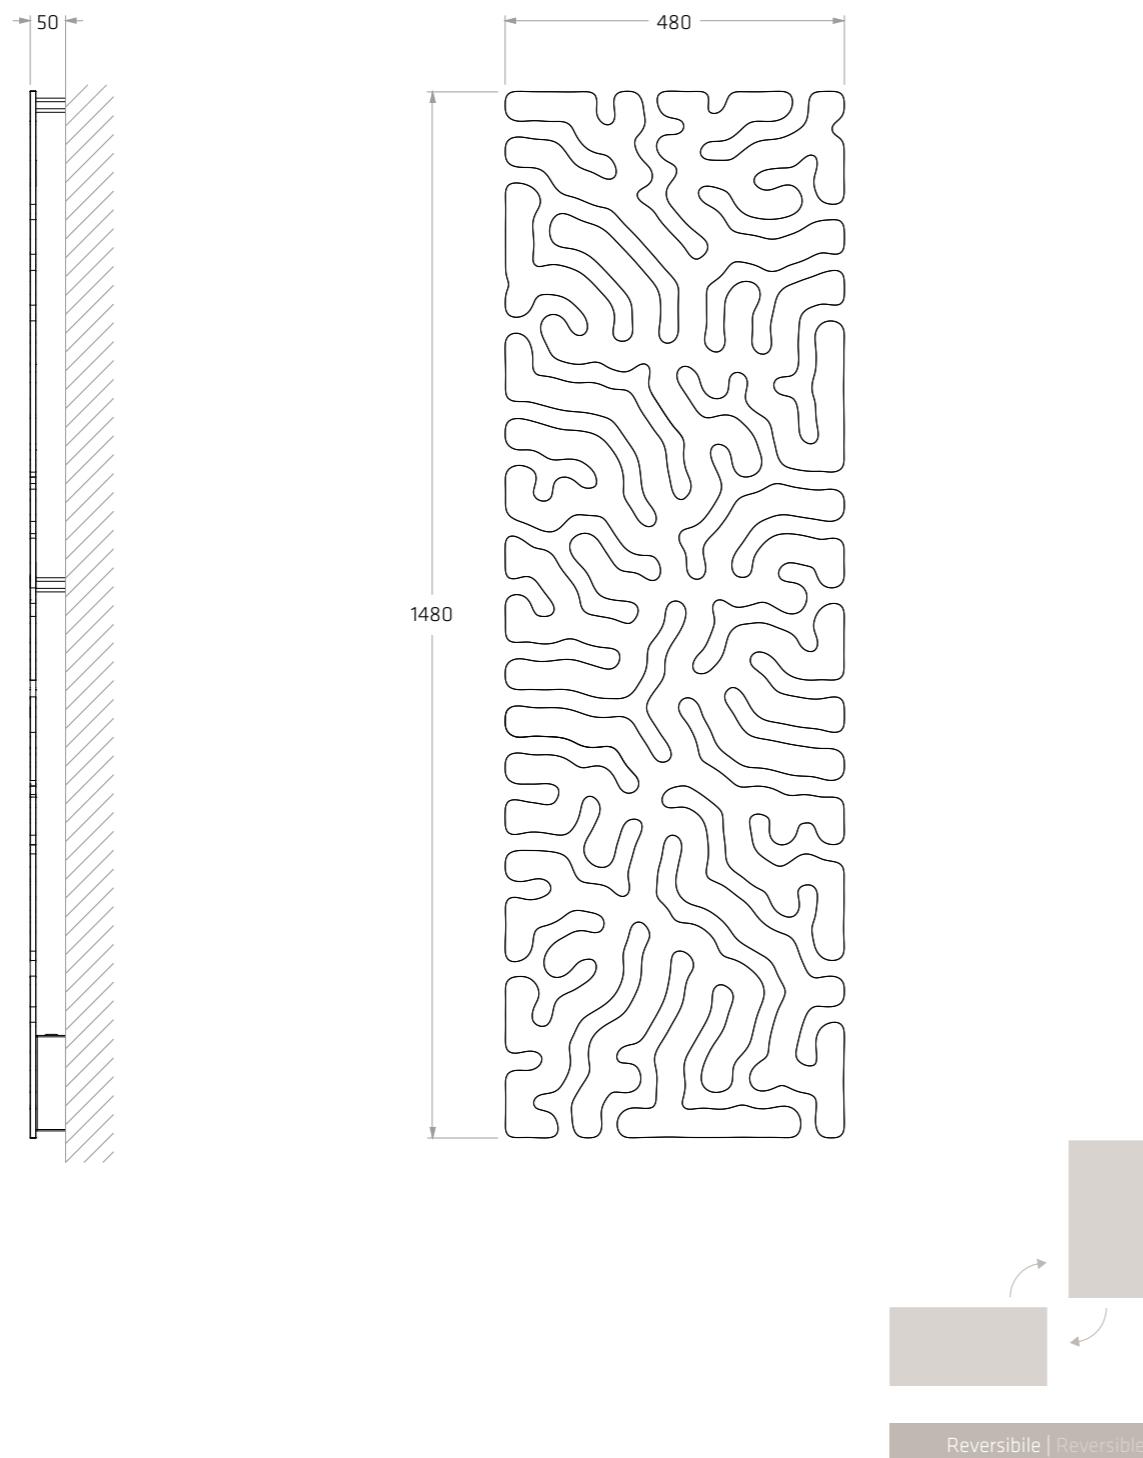

Ispirata dalla ricerca di applicazione dei sistemi generativi, la collezione Coral si propone come punto d'incontro tra design e natura all'interno delle nostre case. Termoarredi elettrici ad alta resa, realizzati interamente in alluminio, sono alimentabili sia da punto luce che tramite cavo plugin, e programmabili tramite app che permette di impostare orari e giorni di accensione.

Inspired by the research of the application of generative systems, Coral collection is proposed as a meeting point between design and nature within our homes. High-performance electric radiators, made entirely of aluminium, can be powered both from light point or plugin cable, and can be programmed via app that allows you to set times and days of ignition.

# CORAL

Termoarredo elettrico interamente realizzato in alluminio ad alto spessore, installabile sia verticalmente che orizzontalmente.  
Electric radiator entirely made of high thickness aluminium, which can be installed both vertically and horizontally.

# PIN

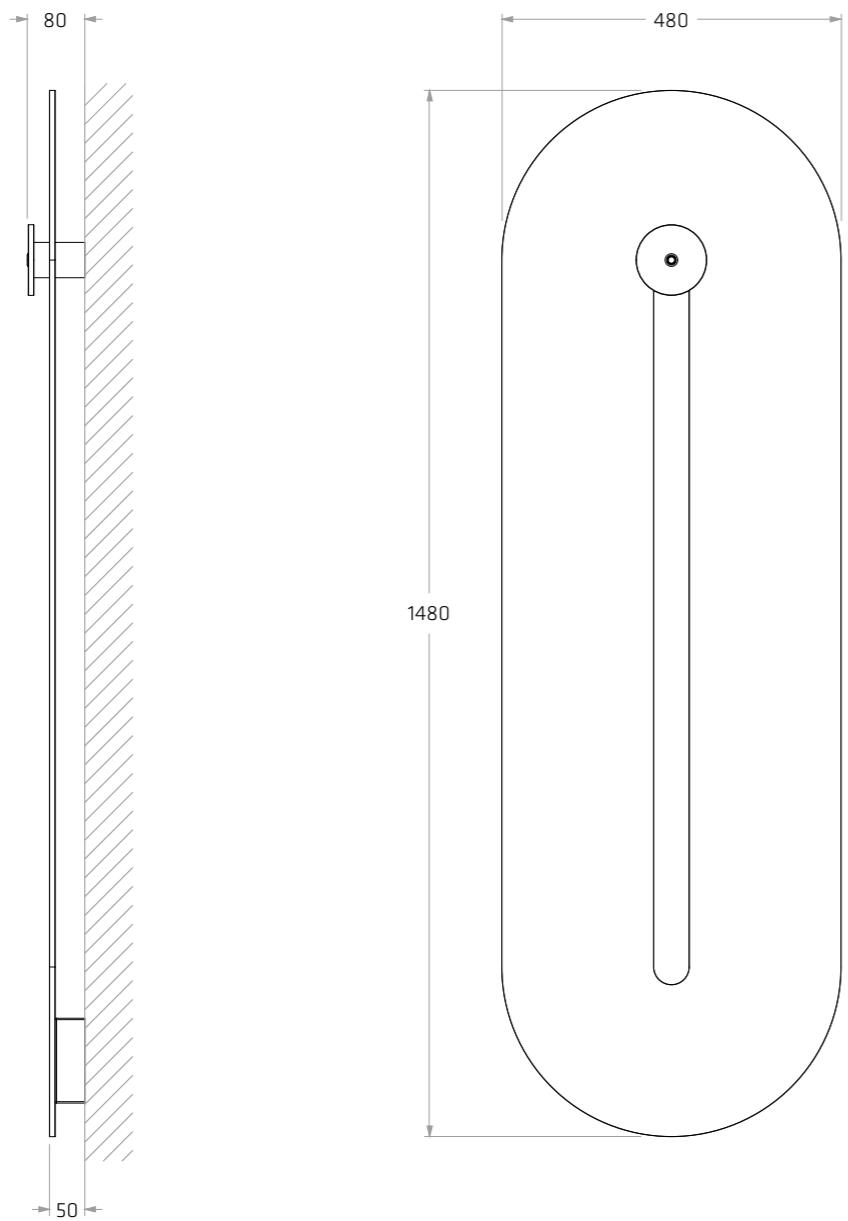

Design Paolo D'Arrigo

Pin è una proposta fresca e riconoscibile, un tributo alle nuove forme dell'abitare contemporaneo. Il caratteristico gancio centrale, oltre a sostenere il termoarredo, è un comodo appendiabiti e salviette. La vasta scelta di finiture per pannello radiante e gancio, consente innumerevoli combinazioni cromatiche.

Pin is a fresh and recognizable proposal, a tribute to the new forms of contemporary living. The characteristic central hook, in addition to supporting the radiator, is a convenient coat hanger and towel holder. The vast choice of finishes for radiant panels and hooks allows for countless color combinations.

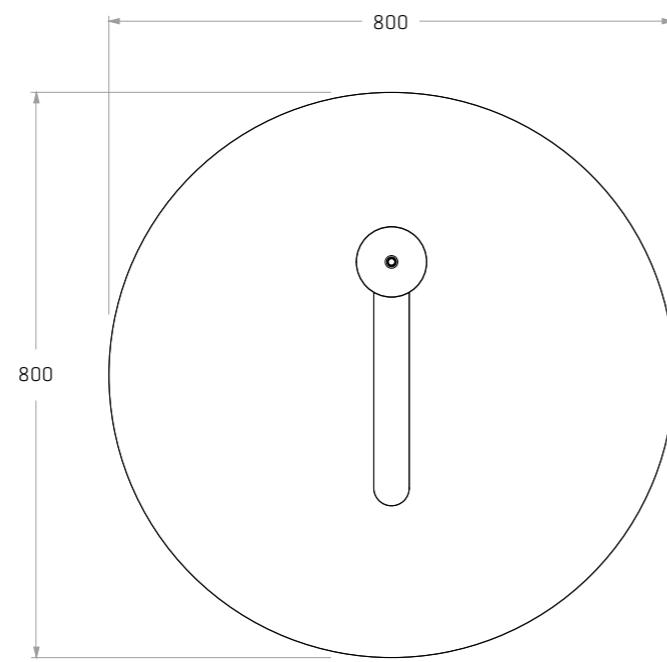

Termoarredo elettrico interamente realizzato in alluminio ad alto spessore.  
Electric radiator entirely made of high thickness aluminium.

# TILT

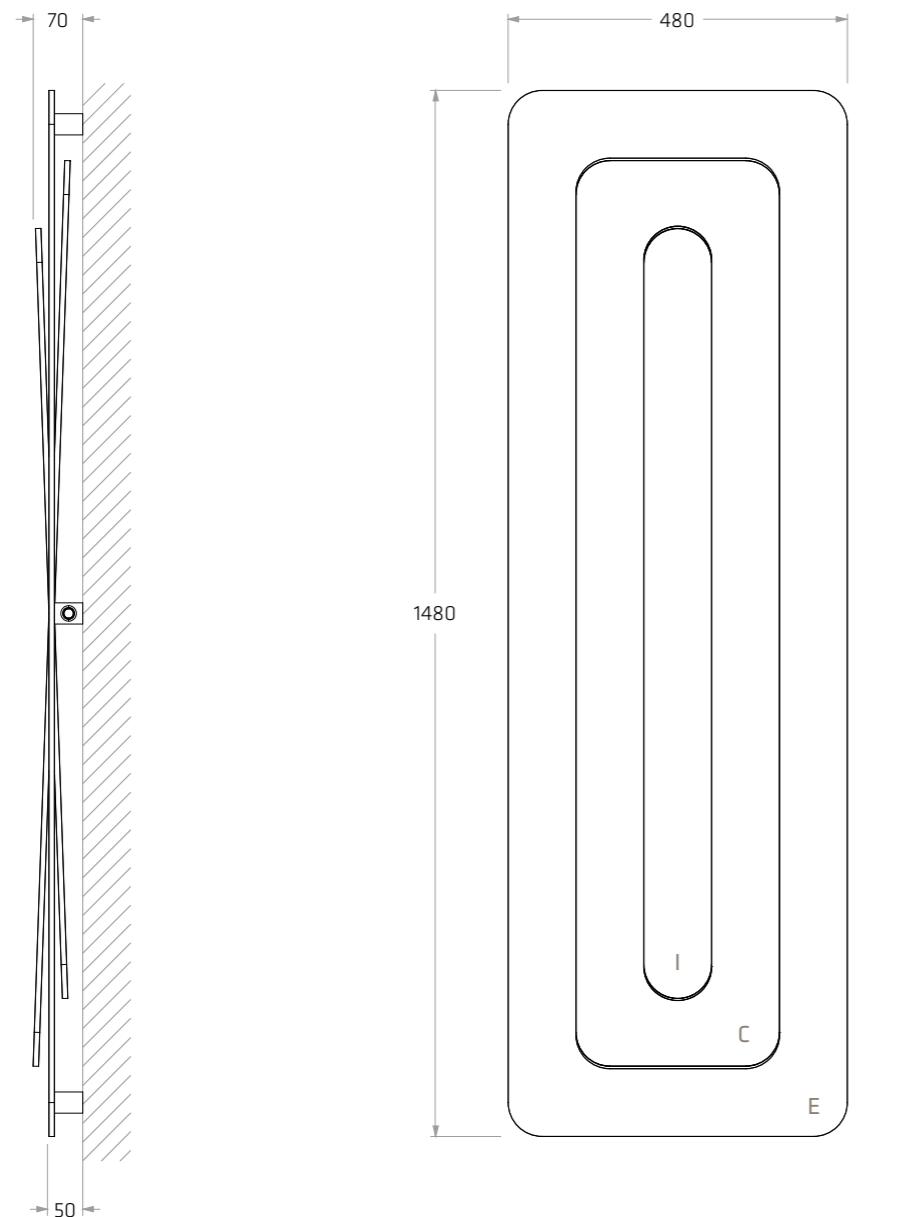

Design Paolo D'Arrigo

Un gioco di piani inclinati per un termoarredo di grande impatto che coniuga funzione ed estetica, grazie all'appendiabito integrato, all'altissima resa termica e alla vastissima possibilità di personalizzazione cromatica. I tre elementi concentrici di Tilt possono infatti essere ordinati in colori e finiture diverse per il massimo della libertà progettuale.

A game of inclined planes for a high-impact radiator that combines functionality and aesthetics, thanks to the integrated coat hanger, the very high thermal output and the vast possibility of chromatic customization. The three concentric elements of Tilt can in fact be ordered in different colors and finishes for maximum design freedom.

Termostato elettrico interamente realizzato in alluminio ad alto spessore.  
Electric radiator entirely made of high thickness aluminium.

Electric programmable radiator with dedicated app, integrated RGB switch with colour temperature display, double power supply system.

# ZIGOZÀ

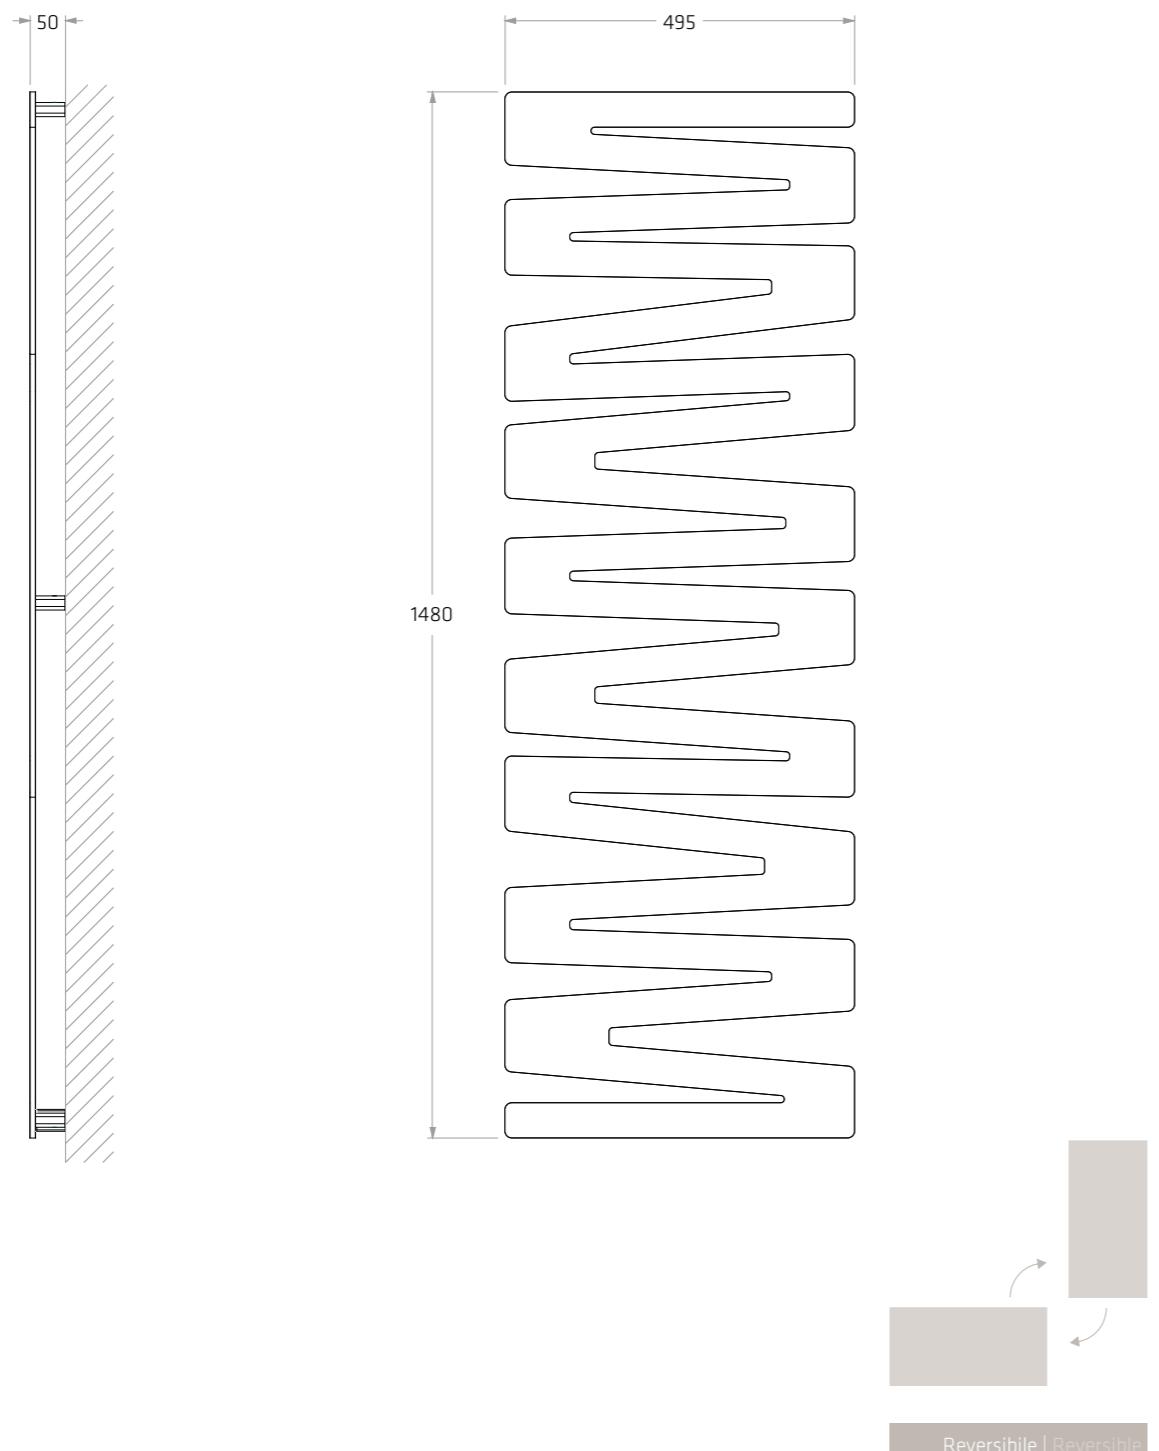

Design Paolo D'Arrigo

Si muove sulla parete con un andamento saliscendi, uno zig-zag sinuoso anche se formato da linee rette e cambi di spessore. Zigozà occupa la superficie aggredendo lo spazio con un modello unico (495x1480 mm) dall'immagine allungata, installabile sia verticalmente che orizzontalmente. La sua forma articolata offre numerose possibilità di aggancio e sostegno per asciugamani e salviette.

Although formed by straight lines and varying thicknesses, Zigozà moves up and down the wall in a sinuous zig-zag, taking over the surface and attacking the space in a single, elongated version (495x1480 mm) which can be installed either vertically or horizontally. Its articulated form lends itself well to use as a versatile towel rail.

Termostato elettrico interamente realizzato in alluminio ad alto spessore, installabile sia verticalmente che orizzontalmente.  
Electric radiator entirely made of high thickness aluminium, which can be installed both vertically and horizontally.

# NODE

Design Paolo D'Arrigo

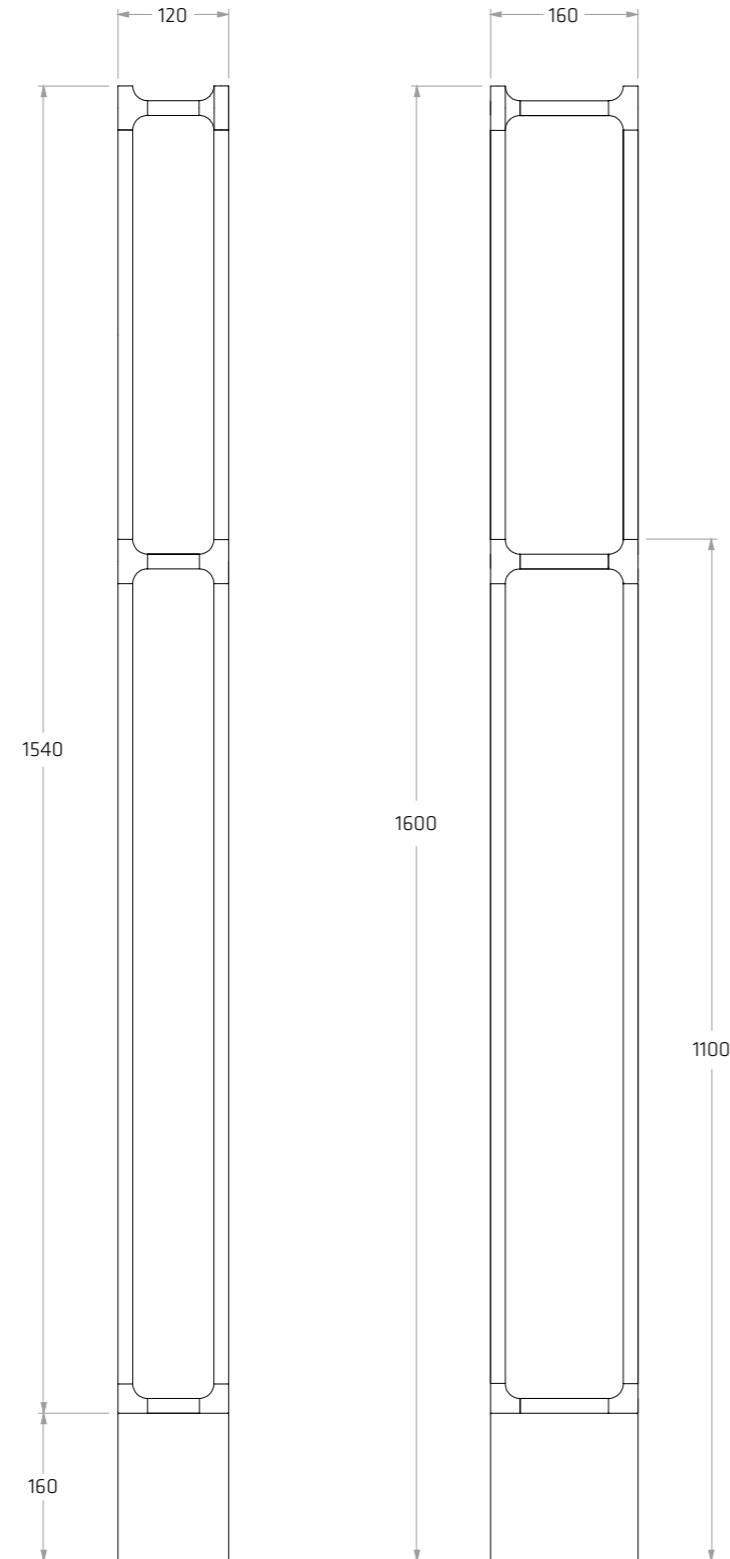

Una proposta scultorea, nata dall'omonima serie di accessori, Node è uno scaldasalviette free-standing il cui impatto estetico, unito alla versatilità data dall'alimentazione elettrica plug-in, lo rendono un prodotto riconoscibile ed innovativo. Dalla resa elevata e totalmente realizzato in ottone, il prodotto si distingue per la sua eleganza ed eccellente qualità.

A sculptural proposal, born from the homonymous series of accessories, Node is a free-standing towel warmer whose aesthetic impact, combined with the versatility given by the plug-in power supply, make it a recognizable and innovative product. With a high yield and totally made of brass, the product stands out for its elegance and excellent quality.

# NAKE

Design Paolo D'Arrigo

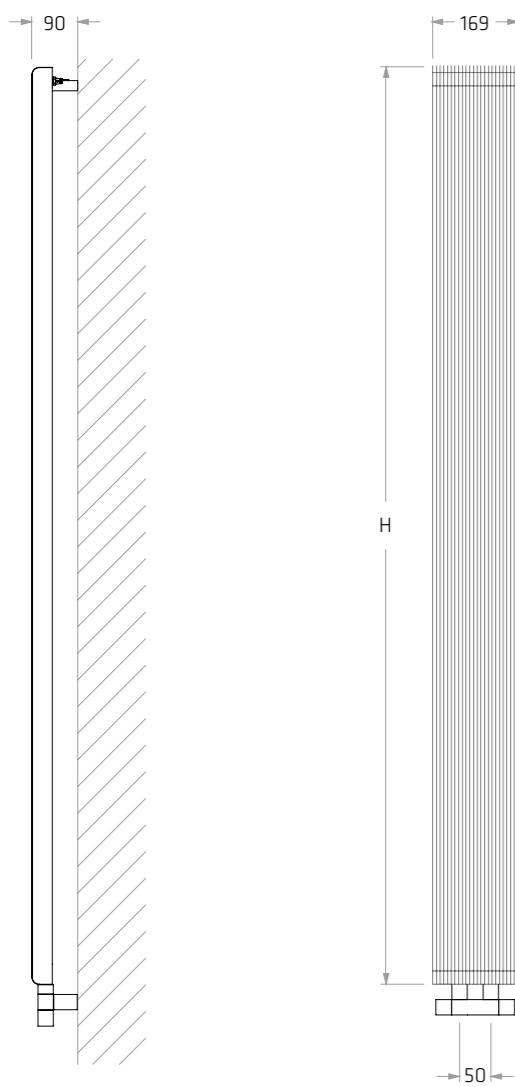

Un approccio concreto e realistico al design, che si distacca dall'estetica manieristica. Il prodotto si configura come essenza della funzione. Un sistema modulare, conformabile e dimensionabile all'infinito, che può essere impiegato sia come termoarredo per il bagno che per altri spazi domestici. Nake è inoltre sinonimo di sostenibilità, essendo realizzato come elemento mono-materico in alluminio, materiale leggero e riciclabile al 100%, all'infinito. Un nuovo approccio al design di nuda ed essenziale semplicità per un nuovo modo di vivere.

A concrete and realistic approach to design, which is detached from the mannerist aesthetic. The product is configured as the essence of the function. A modular, conformable and infinitely sizable system, which can be used both as a radiator for the bathroom and for other domestic spaces. Nake is also synonymous with sustainability, realized by mono-material elements in aluminium, a lightweight and 100% indefinitely recyclable material. A new approach to design of bare and essential simplicity for a new way of living.

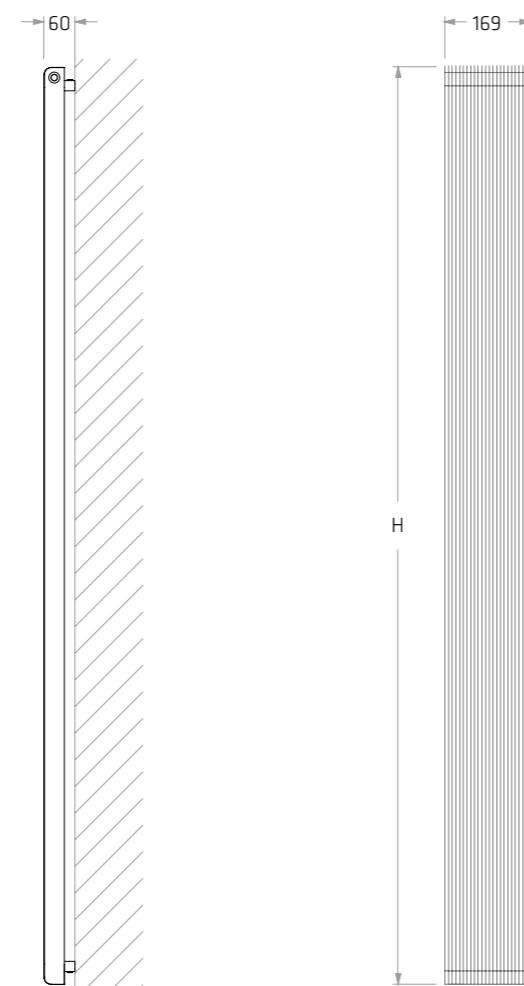

Termostarotto interamente realizzato in alluminio con estruso esclusivo modulare.  
Radiator entirely made of aluminium with exclusive modular extrusion.

## Il sistema Nake | Nake system

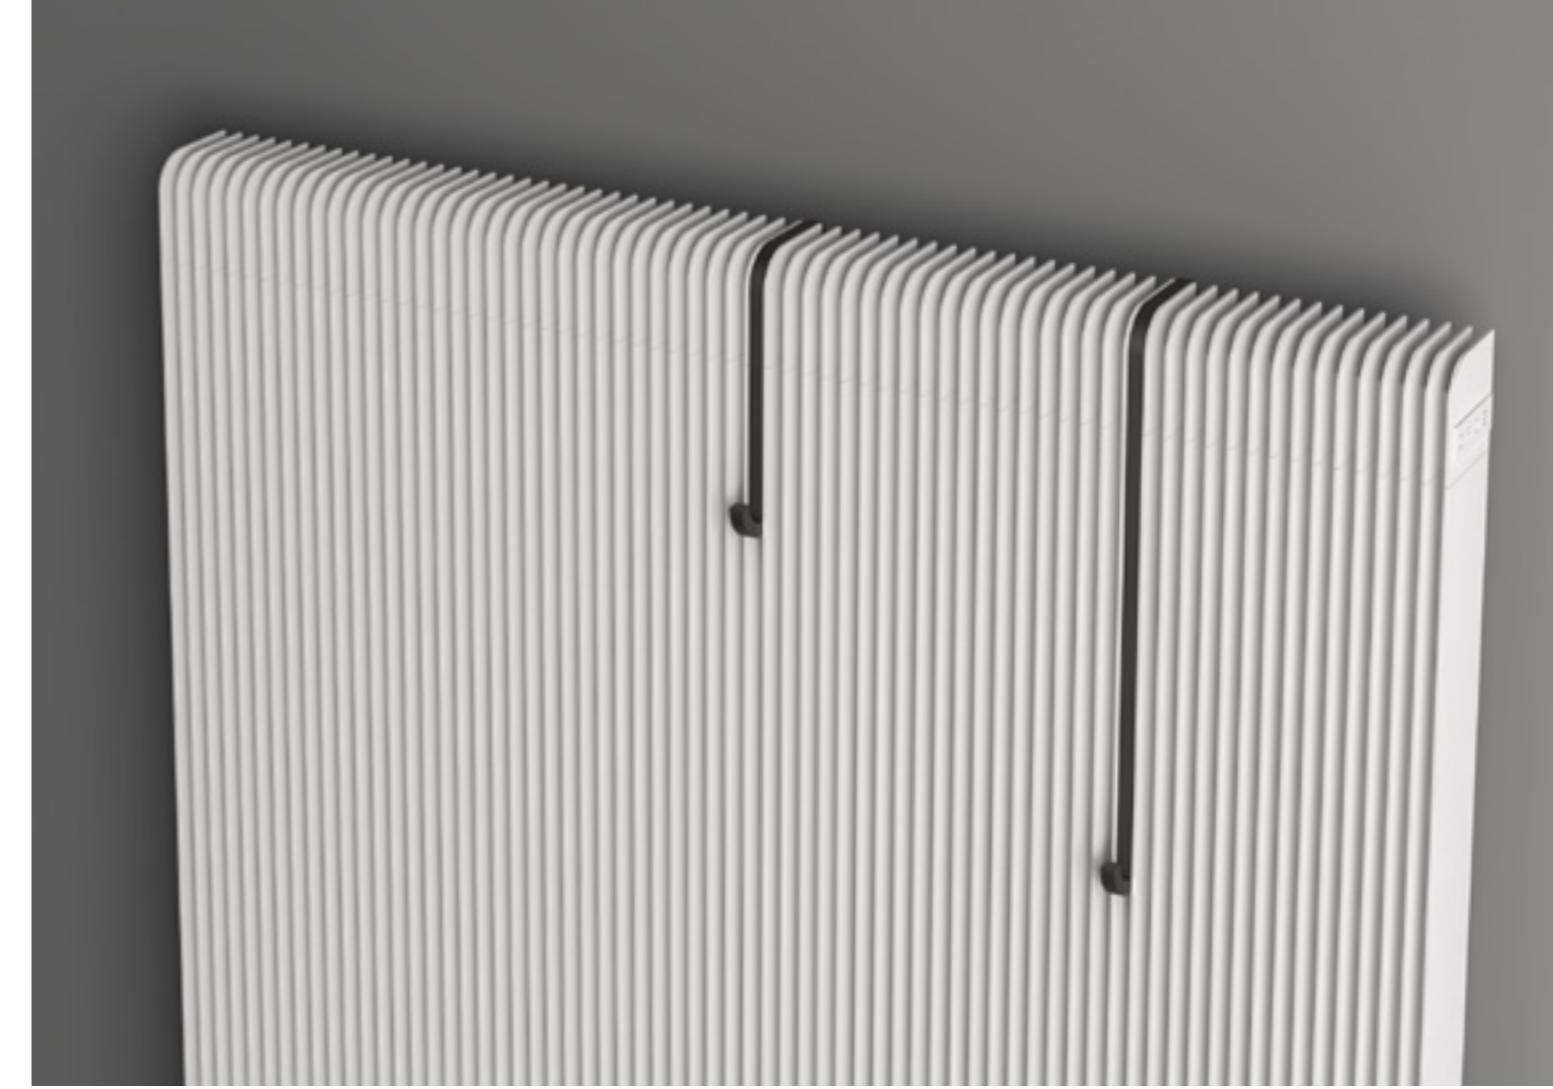

Oltre alle misure standard proposte, il sistema Nake consente massima libertà di dimensionamento affiancando più moduli senza limiti. L'altezza dell'insieme è progettabile al millimetro, da un minimo di 800 mm ad un massimo di 2700 mm. Completa il sistema l'elegante portasalviette ad incastro.

In addition to the standard measures proposed, the Nake system allows full flexibility in sizing by placing several modules side by side without limits. The height of the assembly can be designed to the millimeter, from a minimum of 800 mm to a maximum of 2700 mm. The system is completed by the elegant interlocking coat hanger.

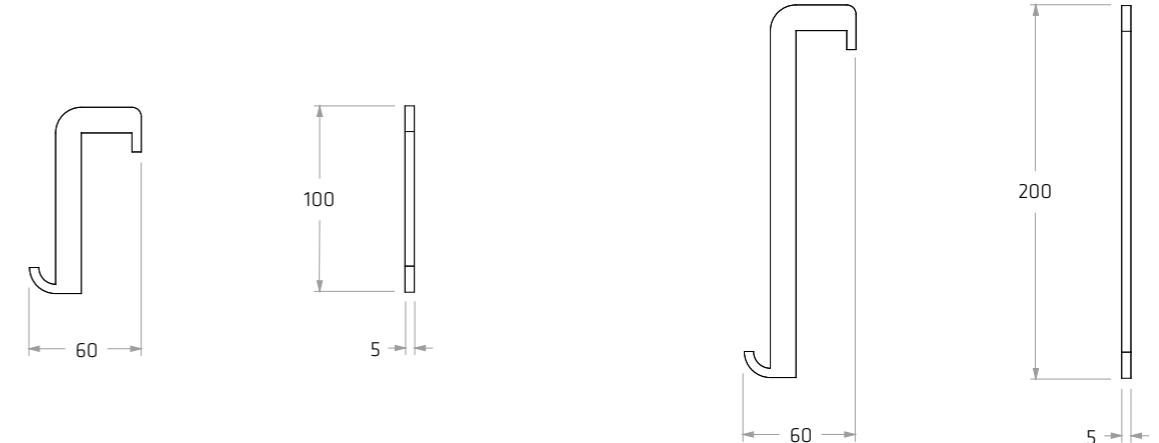

NA1600169 - 169 x 1600 mm - Anodizzato brunito satinato + NA-PS200 Nikel satinato

## Portasalviette | Towel holder

I portasalviette opzionali, interamente realizzati in ottone, sono proposti in due altezze e posizionabili liberamente.

The optional towel holders, entirely made of brass, are offered in two heights and can be positioned as desired.

Valves and tube-covers are supplied at the customer's choice in four finishes: chrome, satin nickel, white painted and black painted.

# LITHOS

Design Paolo D'Arrigo

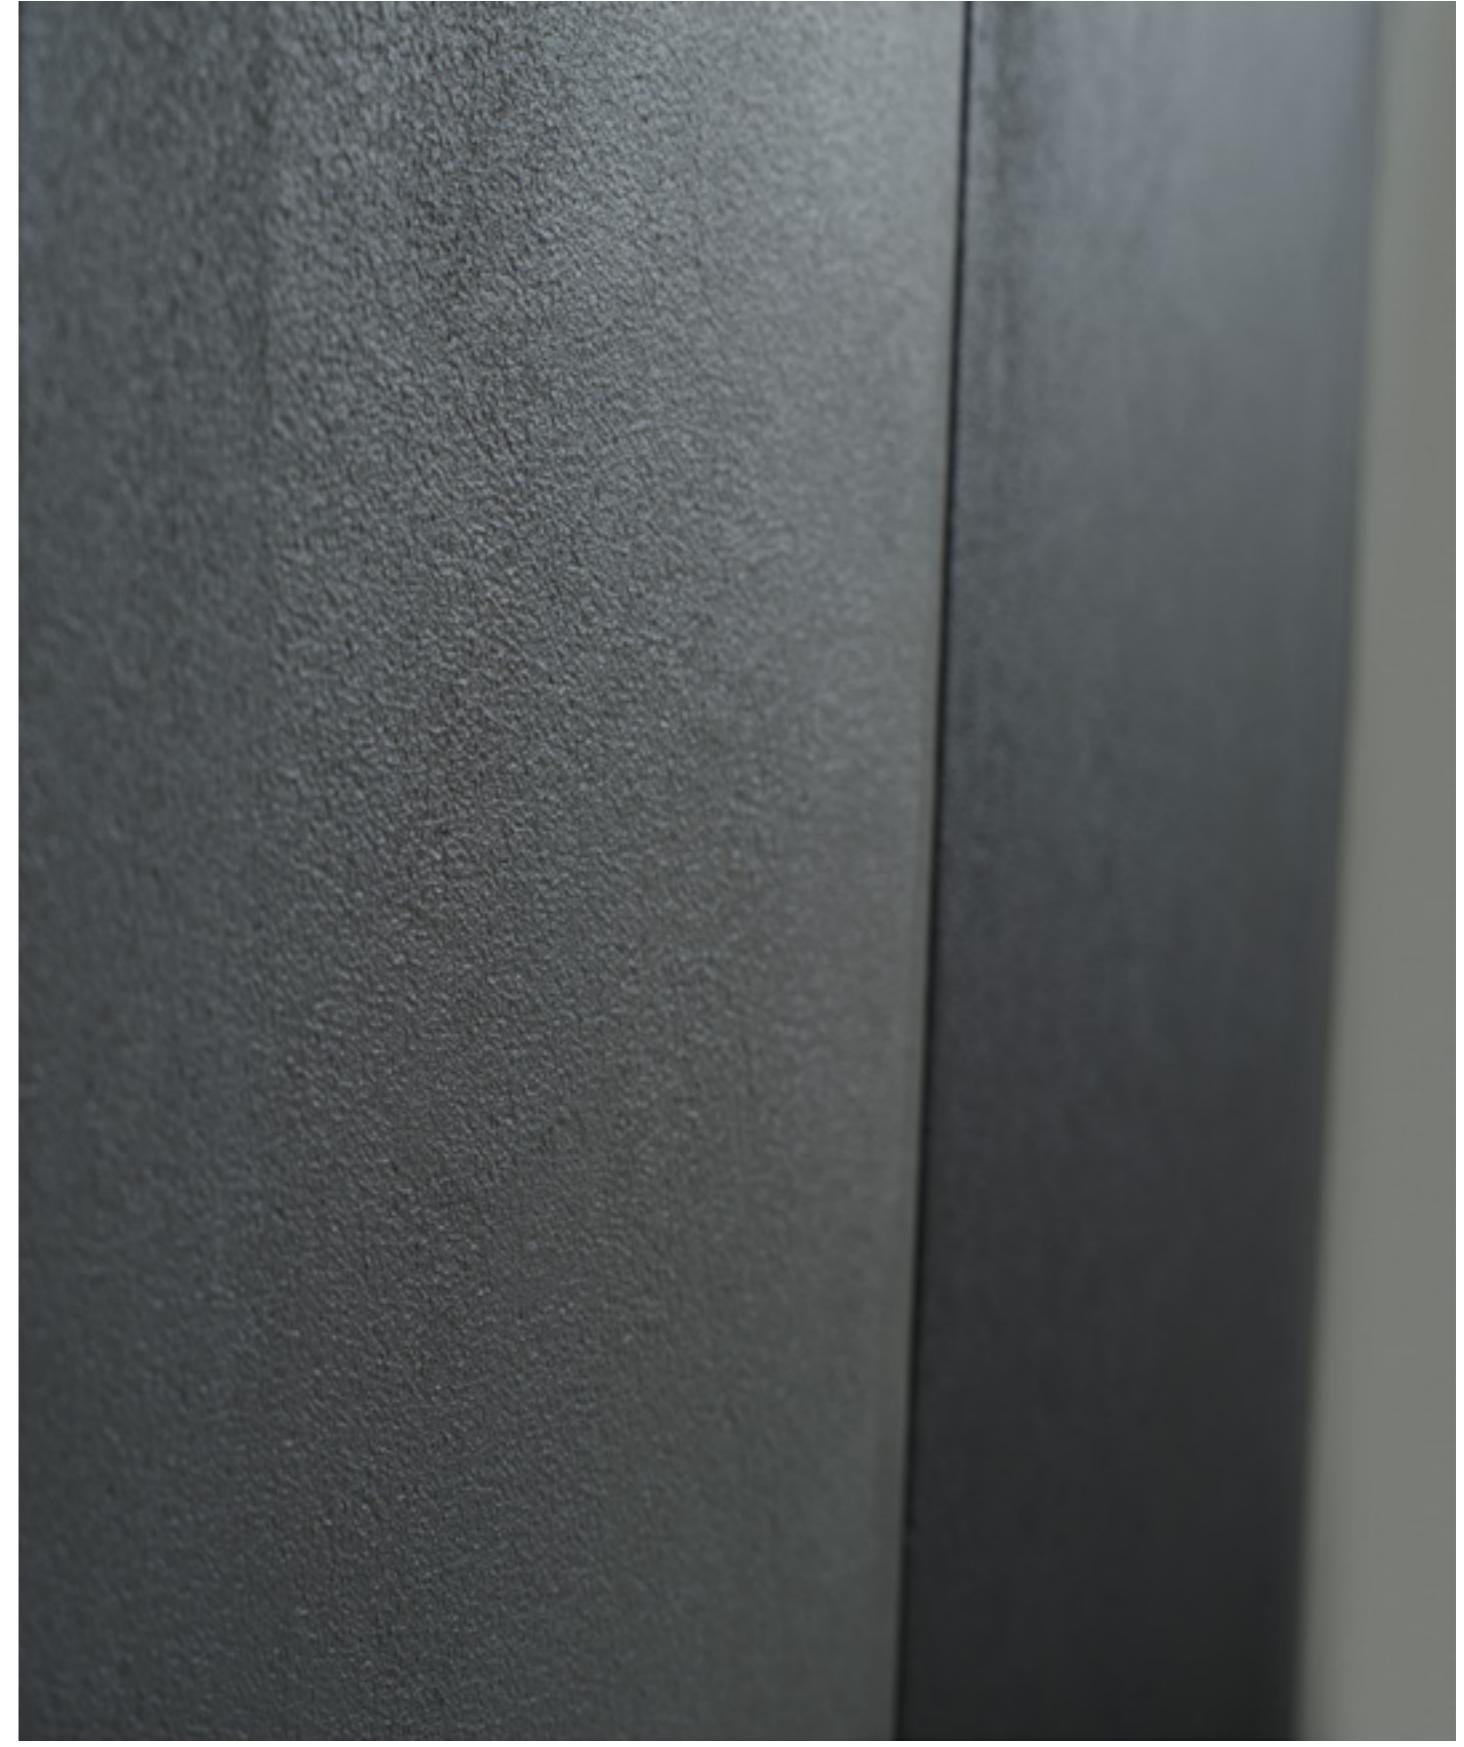

Semplicemente perfetto!  
Lithos è una proposta elegante e contemporanea,  
caratterizzata dalla purezza dei volumi  
e dalle dimensioni inedite. Il sistema magnetico  
di copertura delle valvole permette una pulizia  
assoluta delle forme e facilità di installazione.  
Lithos viene proposto in 3 larghezze: 180, 270  
e 360 mm, ed in 3 altezze: 1400, 1600 e 1800 mm.

Just perfect!  
Lithos is an elegant, contemporary project,  
characterized by purity of volumes and innovative  
dimensions. The magnetic system covering  
the valves allows the absolute smoothness  
of forms and makes installation easy.  
Three different lengths available: 180, 270, 360  
mm and three heights: 1400, 1600, 1800 mm.

interruttore integrato RGB con visualizzazione cromatica della temperatura,  
doppio sistema di alimentazione.

Available in electric version programmable with dedicated app, integrated  
RGB switch with colour temperature display, double power supply system.

IV1800500 - 500 x 1800 mm - Verniciato bluette opaco

# INFRA

Design Paolo D'Arrigo

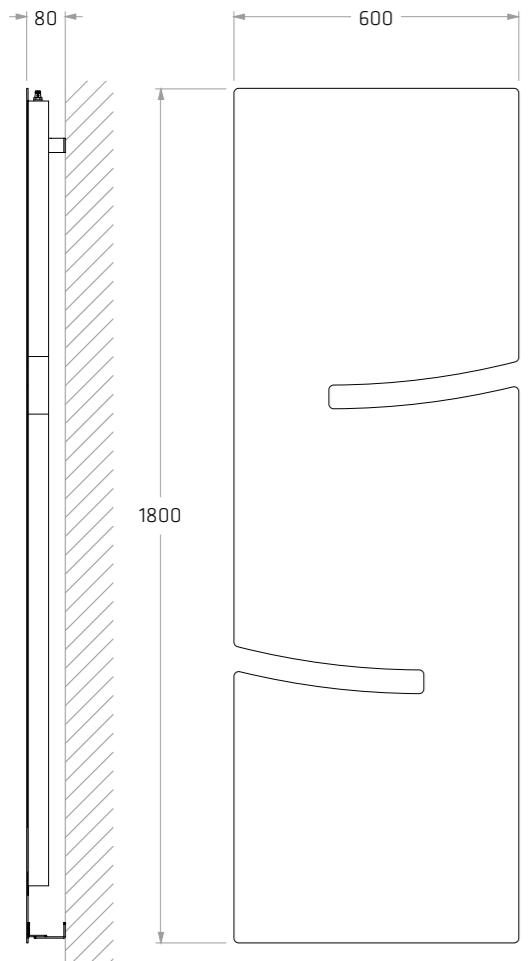

Un rettangolo puro, una geometria assoluta, una superficie omogenea solcata solo da due "tagli" dall'andamento curvilineo ad altezze differenti che diventano pratici portasalviette: Infra è il radiatore dalla forma essenziale che sembra sorridere. Un modello unico (600x1800 mm), pensato per essere installato in verticale fra lavabo e bidet così da servire entrambi.

A pure rectangle, absolute geometry, a smooth surface interrupted by just two curved "gashes" cut out at different heights to serve as practical towel rails: Infra is the radiator with an essential design line which seems to be smiling at you. A single version (600x1800 mm), devised to be installed between washbasin and bidet so as to serve both.

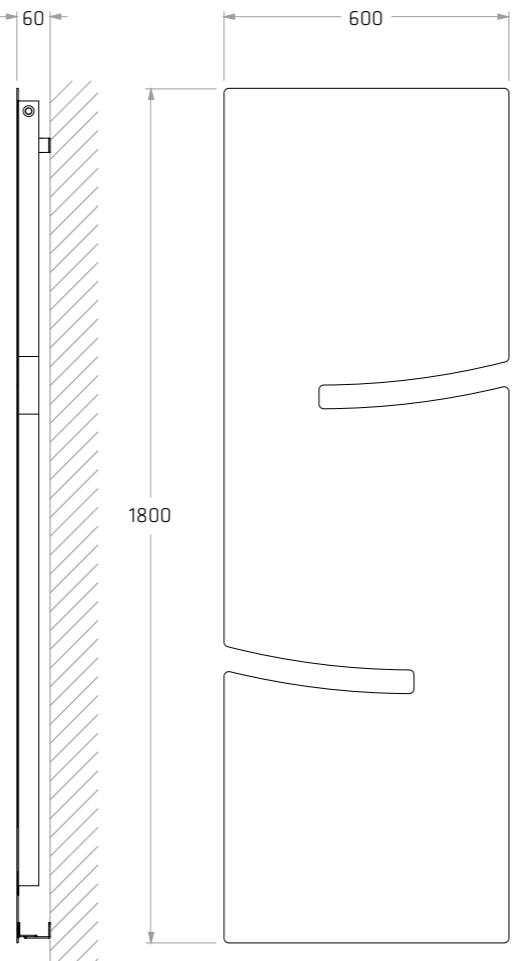

Termostato con pannello frontale e corpo radiante interamente realizzati in alluminio, con portasalviette per lavabo/doccia e bidet intagliati.  
 Radiator with front panel and radiant body entirely made of aluminium,  
 with integrated towel rail for washbasin/shower and bidet.

# PLANA

Design Paolo D'Arrigo

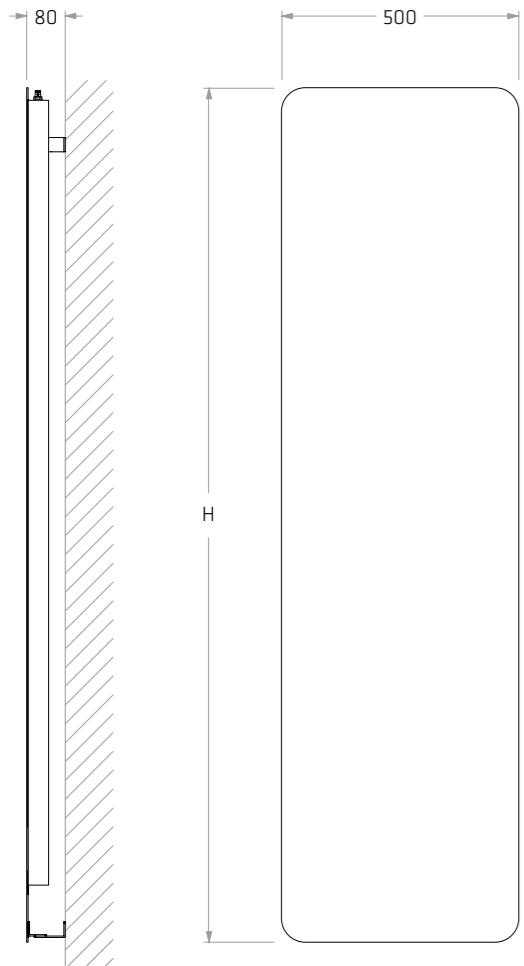

Una superficie omogenea,  
una geometria rettangolare  
con gli angoli arrotondati:  
Plana è un raffinato gioco cromatico  
e di superfici, di campi di colore  
che si valorizzano a vicenda.  
Infiniti moduli e colori omogenei  
sui quali applicare volendo anche  
comodi portasalviette.  
È declinato nelle misure 600x1800,  
600x1500, 500x1800, 500x1500,  
800x800 e orizzontale 1200x600 mm.

A smooth surface, a rectangular  
geometry with rounded corners:  
Plana is a refined play on chromatics  
and surfaces, on blocks of colour  
which enhance each other.  
Countless modules and blocks  
of colour to which handy towel rails  
can also be added.  
The vertical version is available in sizes  
600x1800, 600x1500, 500x1800,  
500x1500, 800x800 and the  
horizontal version 1200x600 mm.

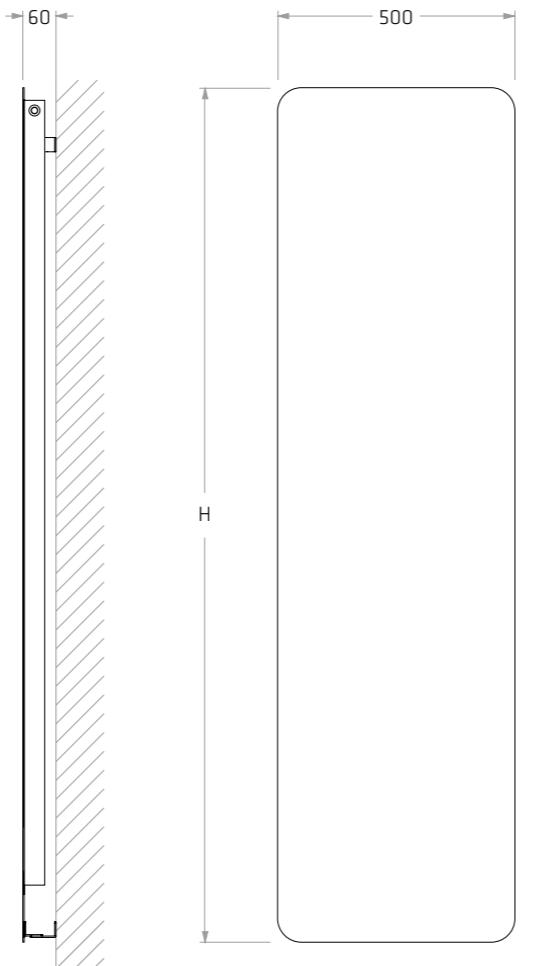

Termostatic radiators with front panel and radiant body entirely made of aluminium, with optional towel rails.  
Radiators with front panel and radiant body entirely made of aluminium, with optional towel rails.

PL6001200 - 600 x 1200 mm - Foglia argento

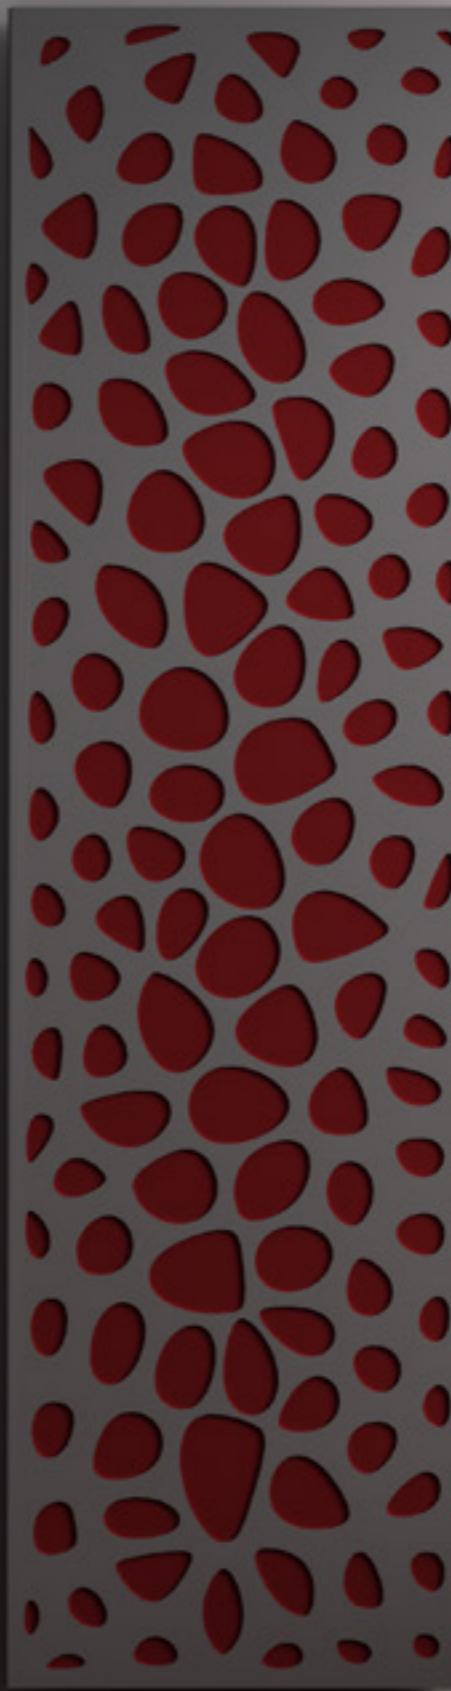

# RÉSEAU

Design Paolo D'Arrigo

Forme organiche, illusioni ottiche ottenute tramite il colore, campiture cromatiche che sembrano generare movimento in un oggetto chiaramente statico. I nuovi approcci al design assistito dagli algoritmi si ritrovano in questo termoarredo che gioca sulla sovrapposizione di superficie e preziose finiture. Completano la proposta i portasalviette opzionali.

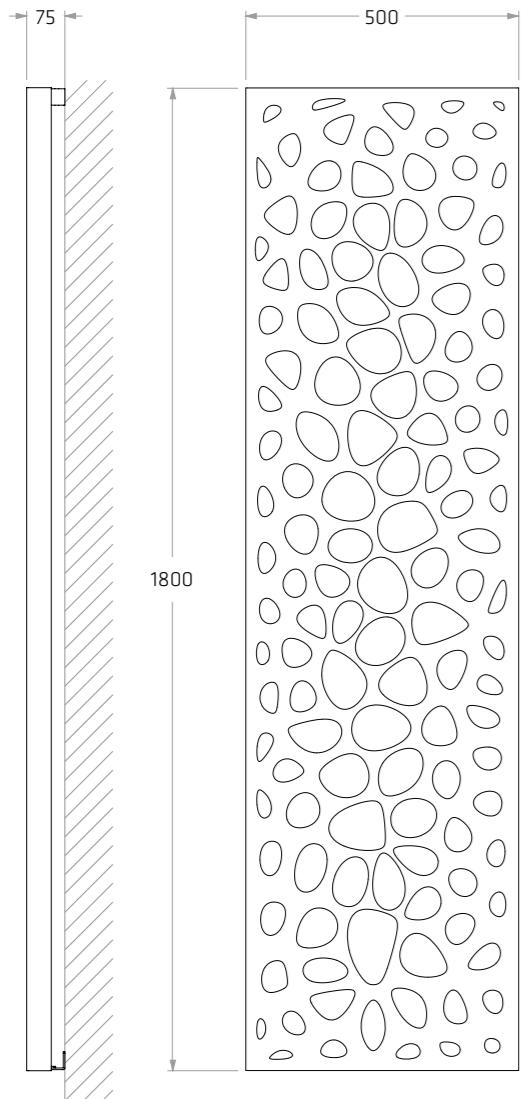

Organic shapes, optical illusions obtained through color, chromatic backgrounds that seem to generate movement in a clearly static object. New approaches to algorithm-assisted design are found in this radiator that plays on the superimposition of precious surfaces and finishes. The proposal is completed by the optional towel rails.

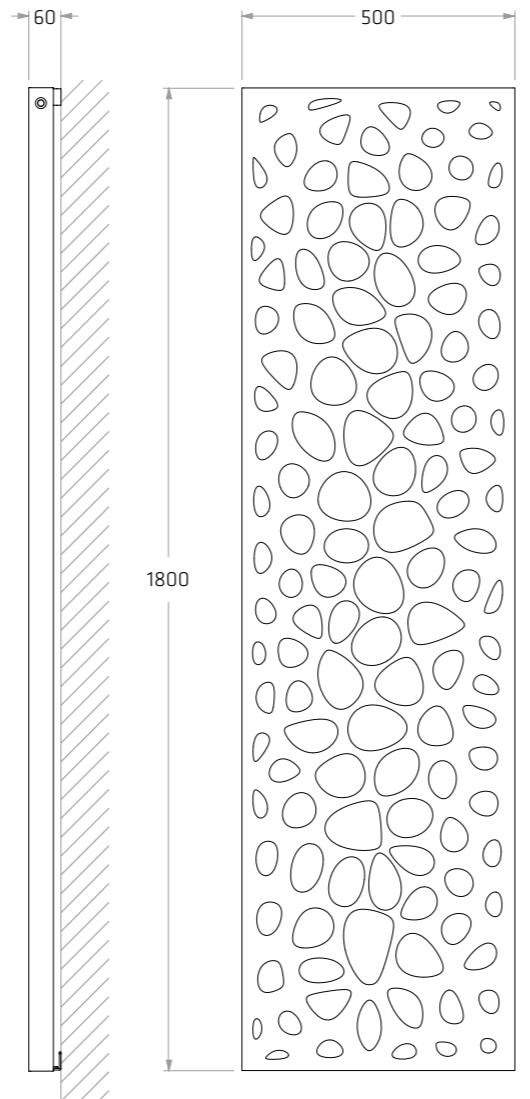

Termostarotto con pannello frontale e corpo radiante interamente realizzati in alluminio, con sfondo uniforme e lamiera sovrapposta decorata con intagli laser.

Radiator with front panel and radiant body entirely made of aluminium, with uniform background and superimposed panel with lasercut decorations.

# NOUVEAU

Design Paolo D'Arrigo

Figure simili a piante e fiori, richiamo evidente allo "stile floreale" che contaminò l'arte a cavallo del Novecento e che in Italia venne definito Stile Liberty: Nouveau gioca con una superficie "intagliata", che si sovrappone ad un volume puro, a creare un effetto decalcomania in rilievo, valorizzato dal contrasto cromatico fra il disegno e lo sfondo, proposto in colori differenti anche molto accesi.

Shapes recalling plants and flowers, clearly influenced by the "floral style" of art popular at the turn of the twentieth century, referred to as the Liberty Style in Italy: Nouveau plays with a "cut out" surface, which is then placed on top of a plain volume, creating a transfer effect in relief, enhanced by the contrasting colours of the drawing and the background, offered in a range of colours, including brights.

# JAPÒ

Design Paolo D'Arrigo

Sono le raffinate atmosfere giapponesi, legate al mondo della natura e ai suoi elementi, il riferimento evidente di Japò, nel quale spicca l'eleganza del decoro delle foglie di bamboo, la cui immagine incisa risalta grazie al contrasto con il colore dello sfondo.

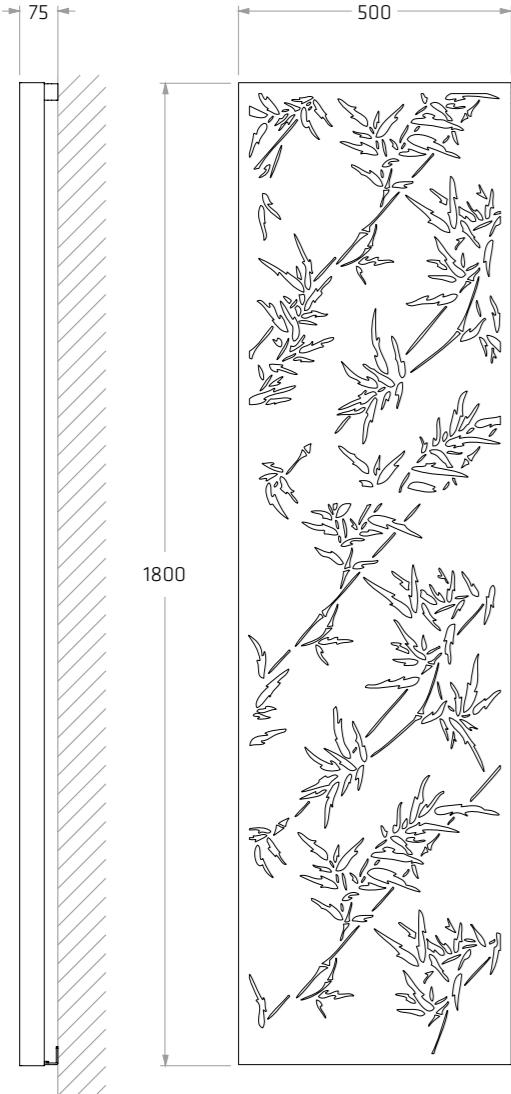

Refined Japanese atmospheres, linked to the world of nature and its elements, are clearly the inspiration behind Japò, with its elegant bamboo leaf design, the engraved image of which stands out thanks to the contrast in colour with the background.

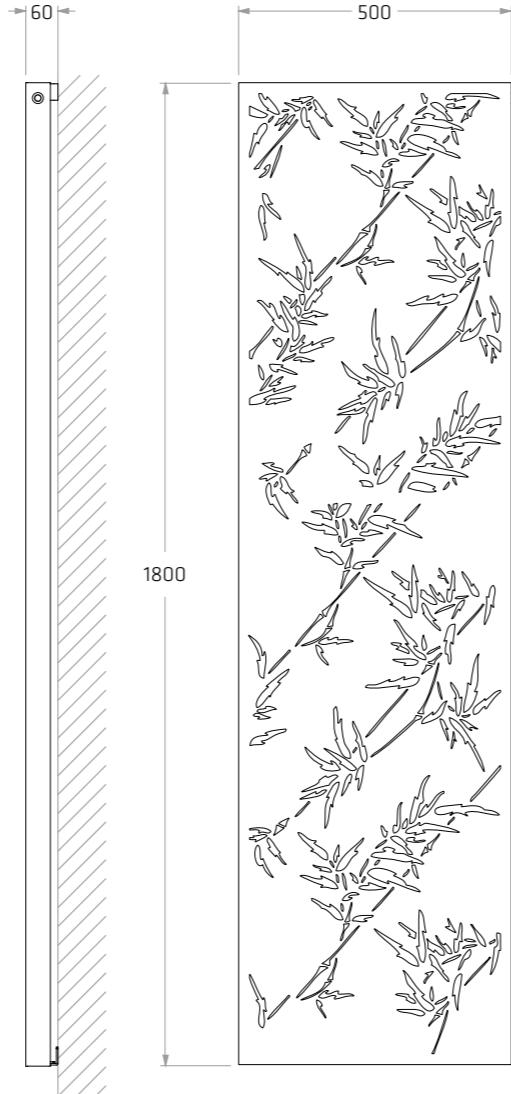

Termostato con pannello frontale e corpo radiante interamente realizzati in alluminio, con sfondo uniforme e lamiera sovrapposta decorata con intagli laser.

# PICK

Design Paolo D'Arrigo

La nuova forma del calore!  
Pick è una proposta innovativa sia formalmente che funzionalmente. Grazie al nuovo profilo esclusivo a forma di plettro (Pick in inglese), il termoarredo da un lato acquisisce un'estetica archetipica e riconoscibile, dall'altro, grazie alla forma e al sapiente posizionamento dei profili, migliora la resa termica inducendo una circolazione ottimale dell'aria calda nell'ambiente.

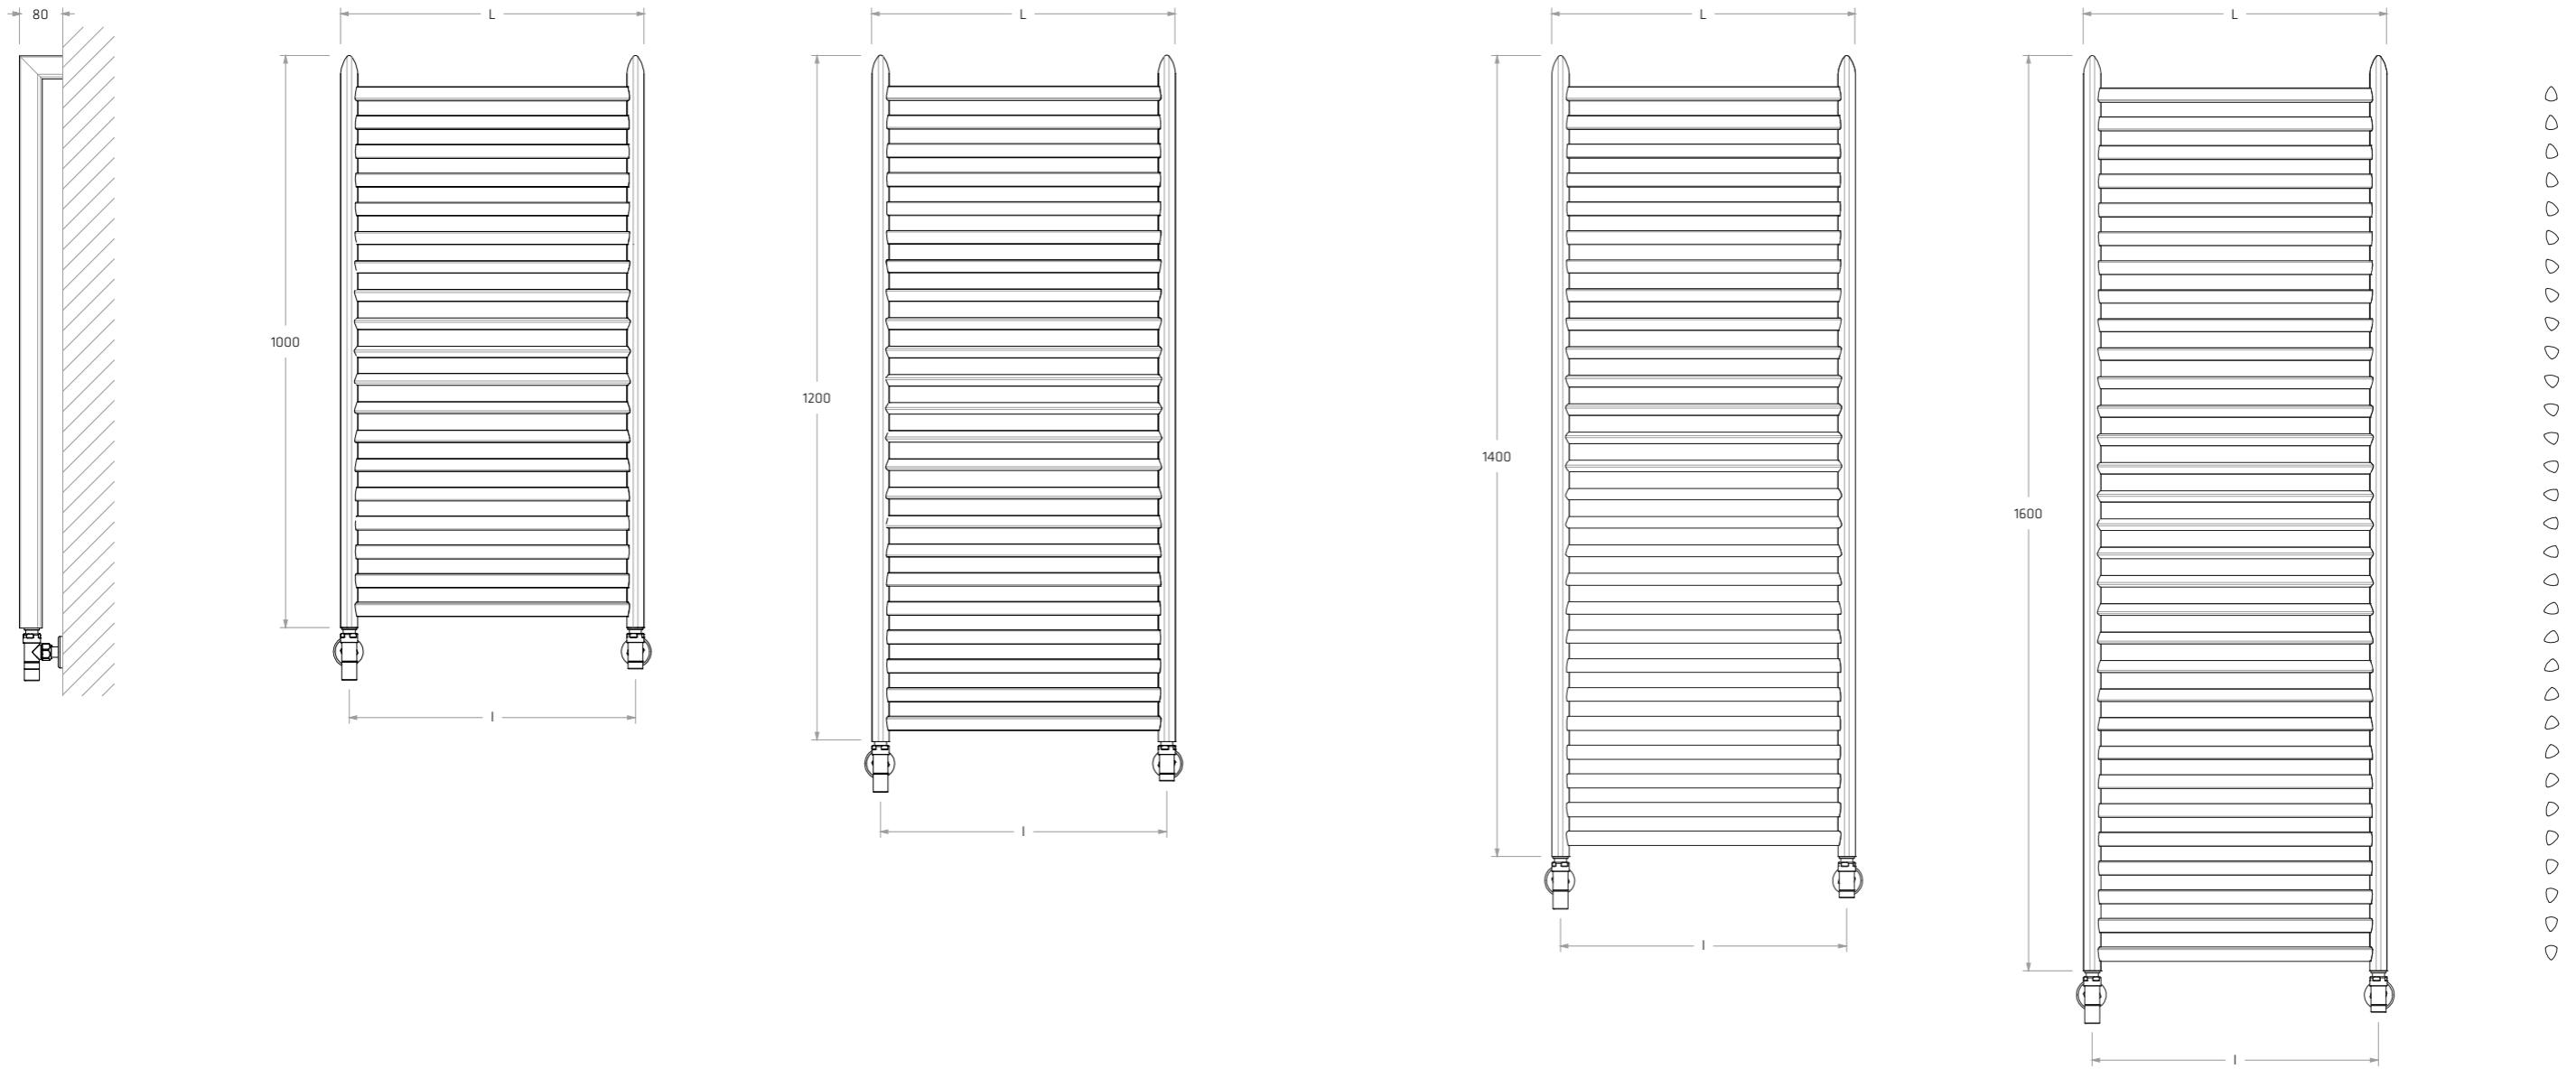

Heat has a new shape!  
Pick is a project with an innovative form and function. Thanks to its new, exclusive pick-shaped outline, the towel heater not only acquires an archetypal, recognizable appearance but also, thanks to its form and skilful positioning of the outlines, improves the heat yield, giving off the optimal flow of warm air in the room.

## Valvole | Valves

Disponibile con valvole termostatiche.

I termoarredi con finitura galvanica e verniciato Bianco vengono forniti con valvole e borchie copritubo della stessa finitura. I colorati vengono forniti con valvole e borchie copritubo Cromo.

Available with thermostatic valves.

Radiators with galvanic plating or painted Bianco come supplied with valves and tube-covers with the same finish. Coloured radiators come supplied with Cromo valves and tube-covers.

# LIBRA

Design Paolo D'Arrigo

Un intreccio armonioso che si libra nello spazio, un tratto veloce per un insieme equilibrato, generato dagli incroci raccordati e dall'intersezione di tracce sottili che disegnano la superficie: leggerezza e poeticità, Libra è un oggetto dal forte impatto estetico, una trama eterea che sembra appoggiarsi delicatamente alla parete proiettandovi la propria silhouette. Design e funzionalità: i segmenti di tubolare a sbalzo possono essere utilizzati come appendi salviette e accappatoi. È disponibile nella versione Libra X, con due montanti verticali curvi dall'andamento speculare ma opposto; Libra Y, con un solo montante verticale e due tracce orizzontali; Libra Z, dall'andamento orizzontale allungato.

A graceful criss-cross floating in the air, designed with a quick stroke of the pen for a balanced whole, produced by interconnecting crosses and the intersection of fine lines which style the surface: light and poetic, Libra has a strong aesthetic impact and a sense of the ethereal, delicately leaning against the wall like a shadow of itself. Design and practicality: the protruding tubular segments can be used as hooks for towels and bathrobes. It is available in the Libra X version, with two vertical curved bars mirroring each other in opposite directions; Libra Y, with a single vertical bar and two horizontal bars; Libra Z, with a horizontal design.

# Libra X

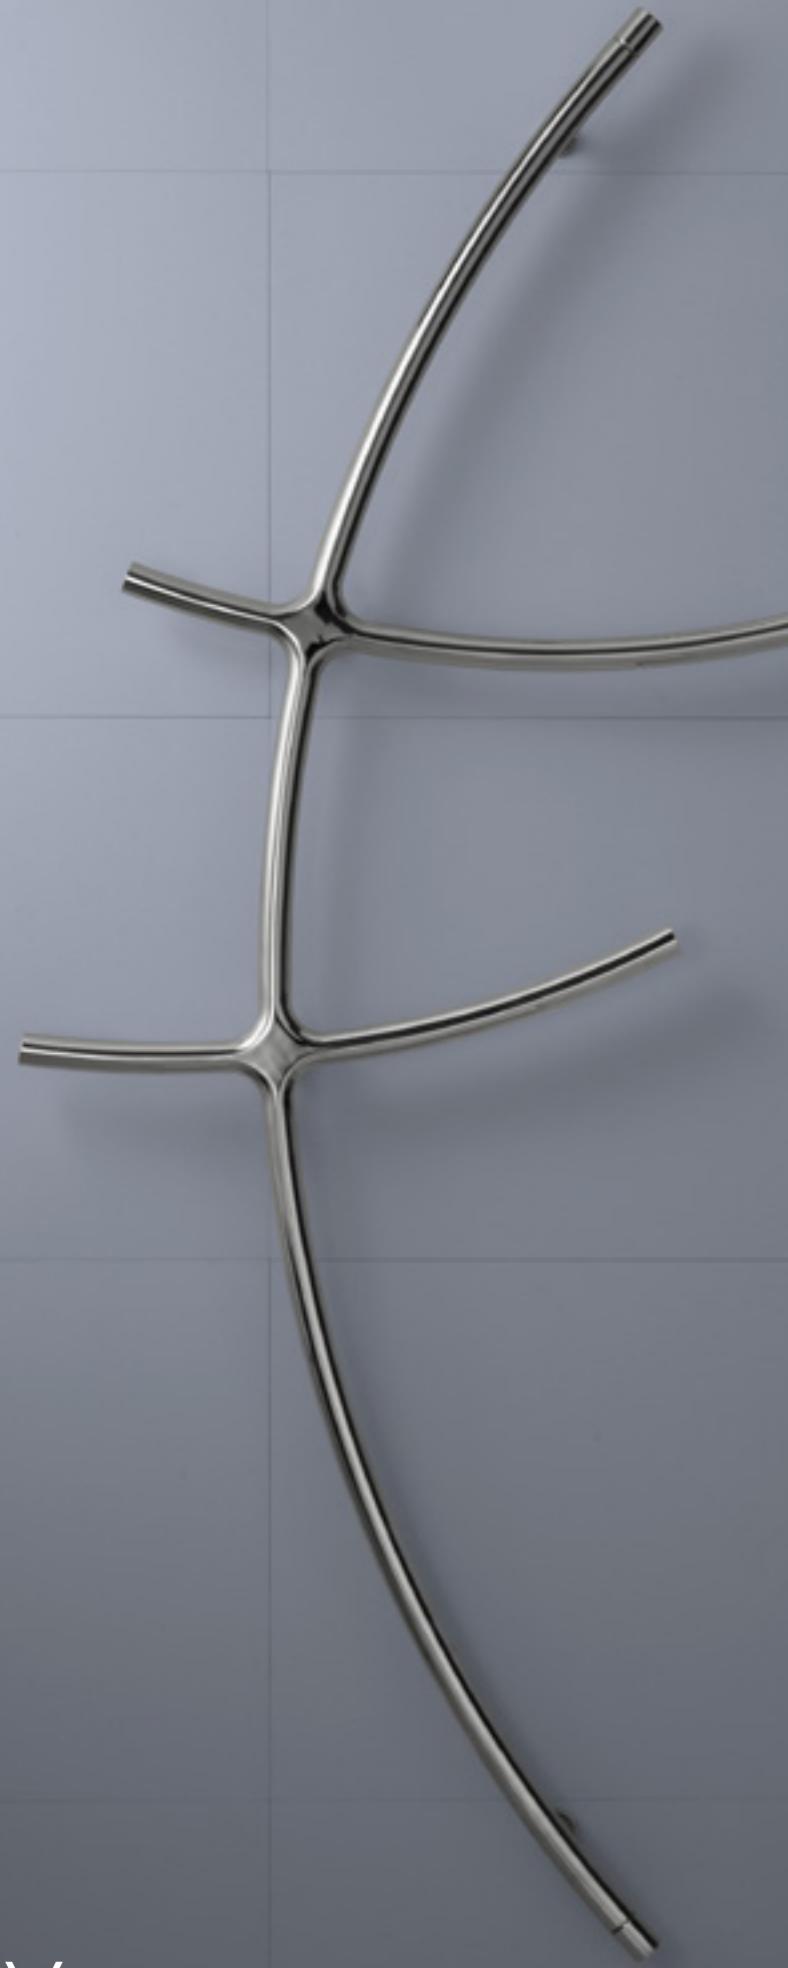

LX - 650 x 1600 mm - Nichel satinato

# Libra Y

LY - 700 x 1700 mm - Cromo

LZ - 1200 x 800 mm - Verniciato nero opaco

# CELSIUS

Design Ufficio progetti CAOS  
Restyling Paolo D'Arrigo

Solido, lineare e compatto, Celsius si compone di una sequenza di tubolari caratterizzati dall'esclusiva sezione smussata, che insieme alle innovative valvole integrate, conferiscono una natura estetica senza eguali. È disponibile anche con piano scaldante a sbalzo orizzontale con funzione di scaldateli.

Solid, linear and compact, Celsius consists of a series of tubes characterized by an exclusive rounded-off shape, which together with the innovative integrated valve, give it an unrivalled sense of aesthetic appeal. It is also available with horizontal heated cantilever shelf which acts as towel-warmer.

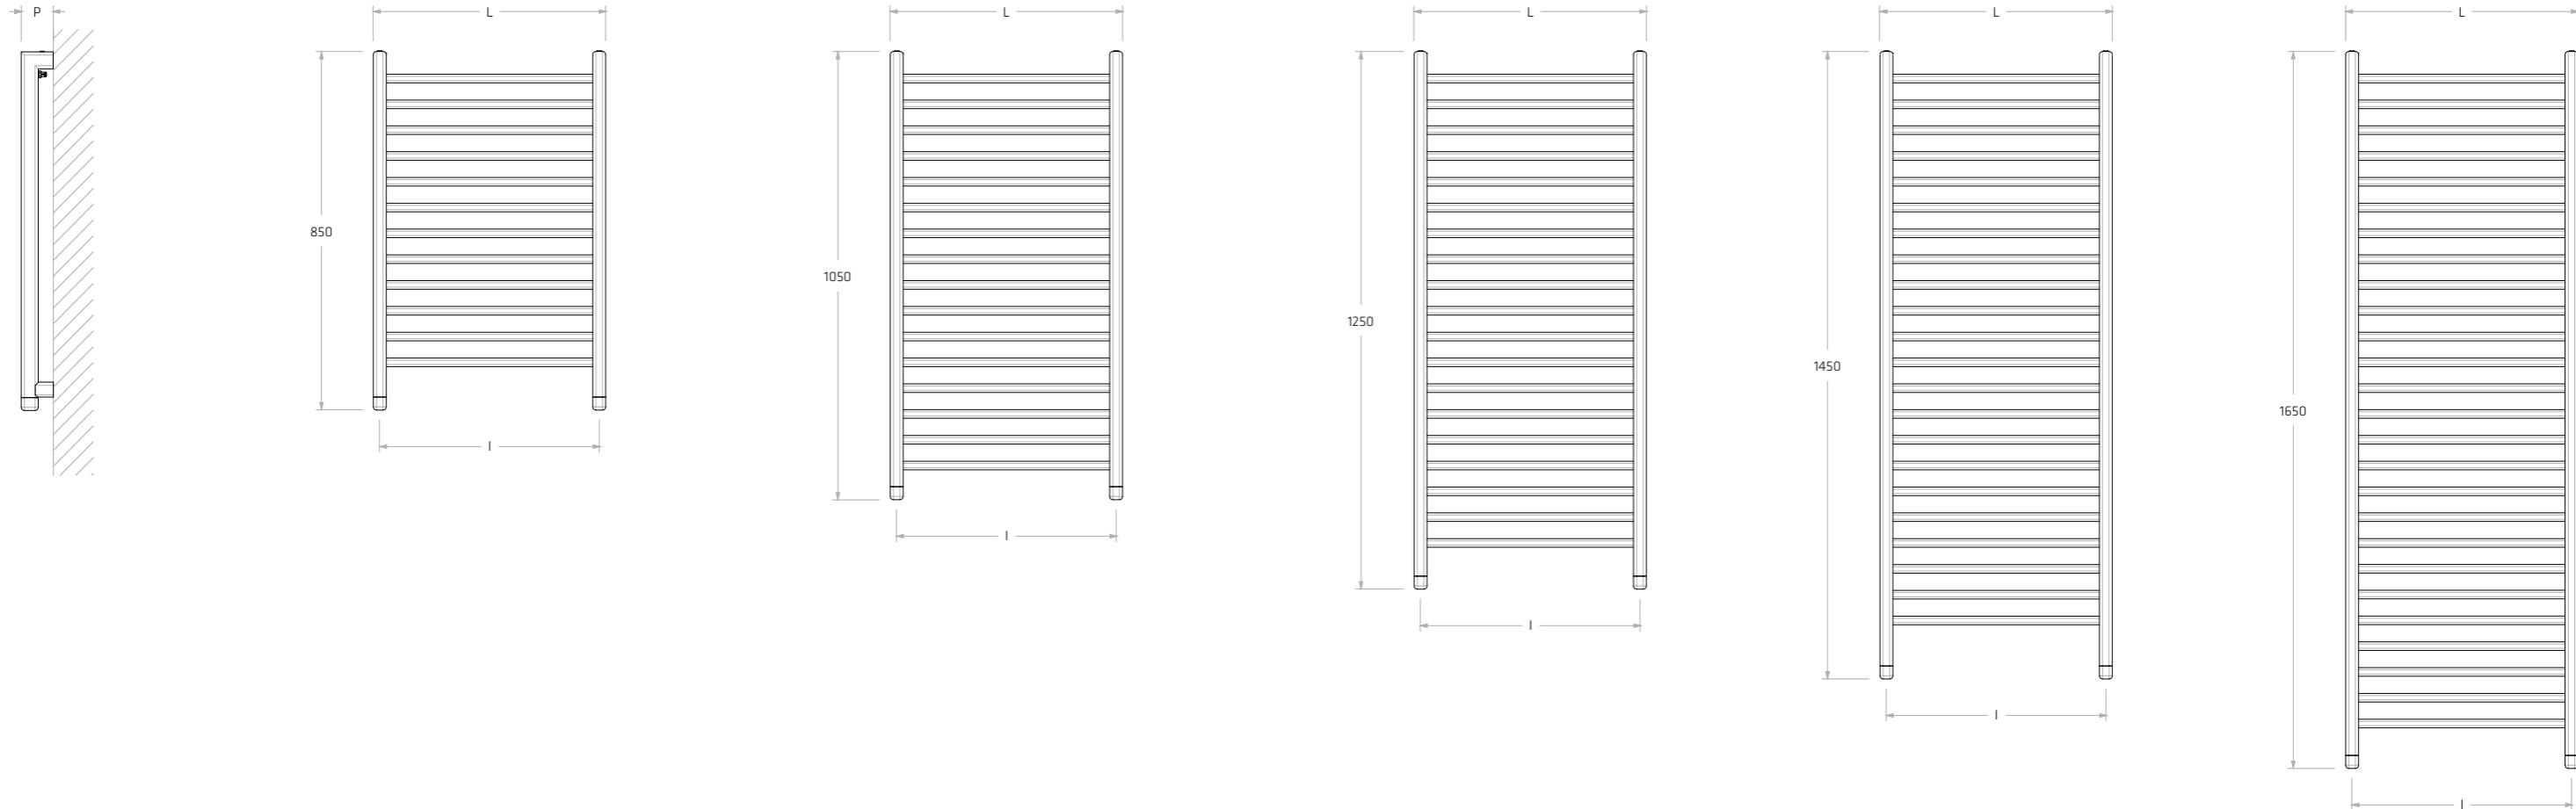

C01650510 - 540 x 1650 mm - Oro satinato

C01250410 - 440 x 70 x 1250 mm - Nichel nero satinato

Termoarredo interamente realizzato in ottone con tubi orizzontali stondati 20x20 mm e tubi verticali stondati a sezione rettangolare 30x40 mm, con valvole integrate.  
Radiator made entirely of brass with 20x20 mm horizontal rounded tubes and 30x40 mm vertical rounded tubes with rectangular section, with integrated valves.

# VICTORIA

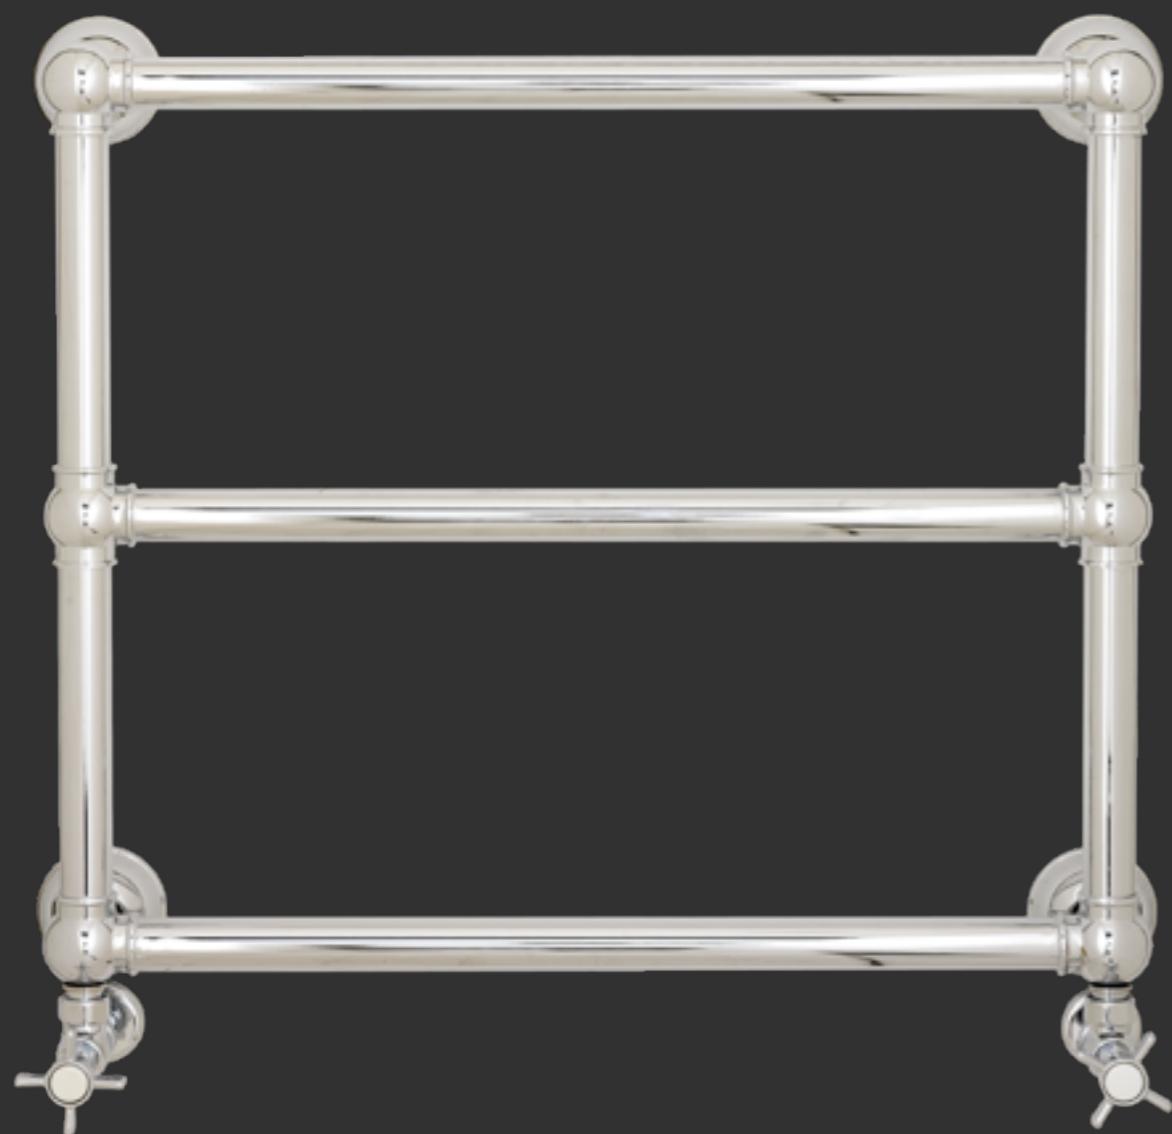

Design Ufficio progetti CAOS

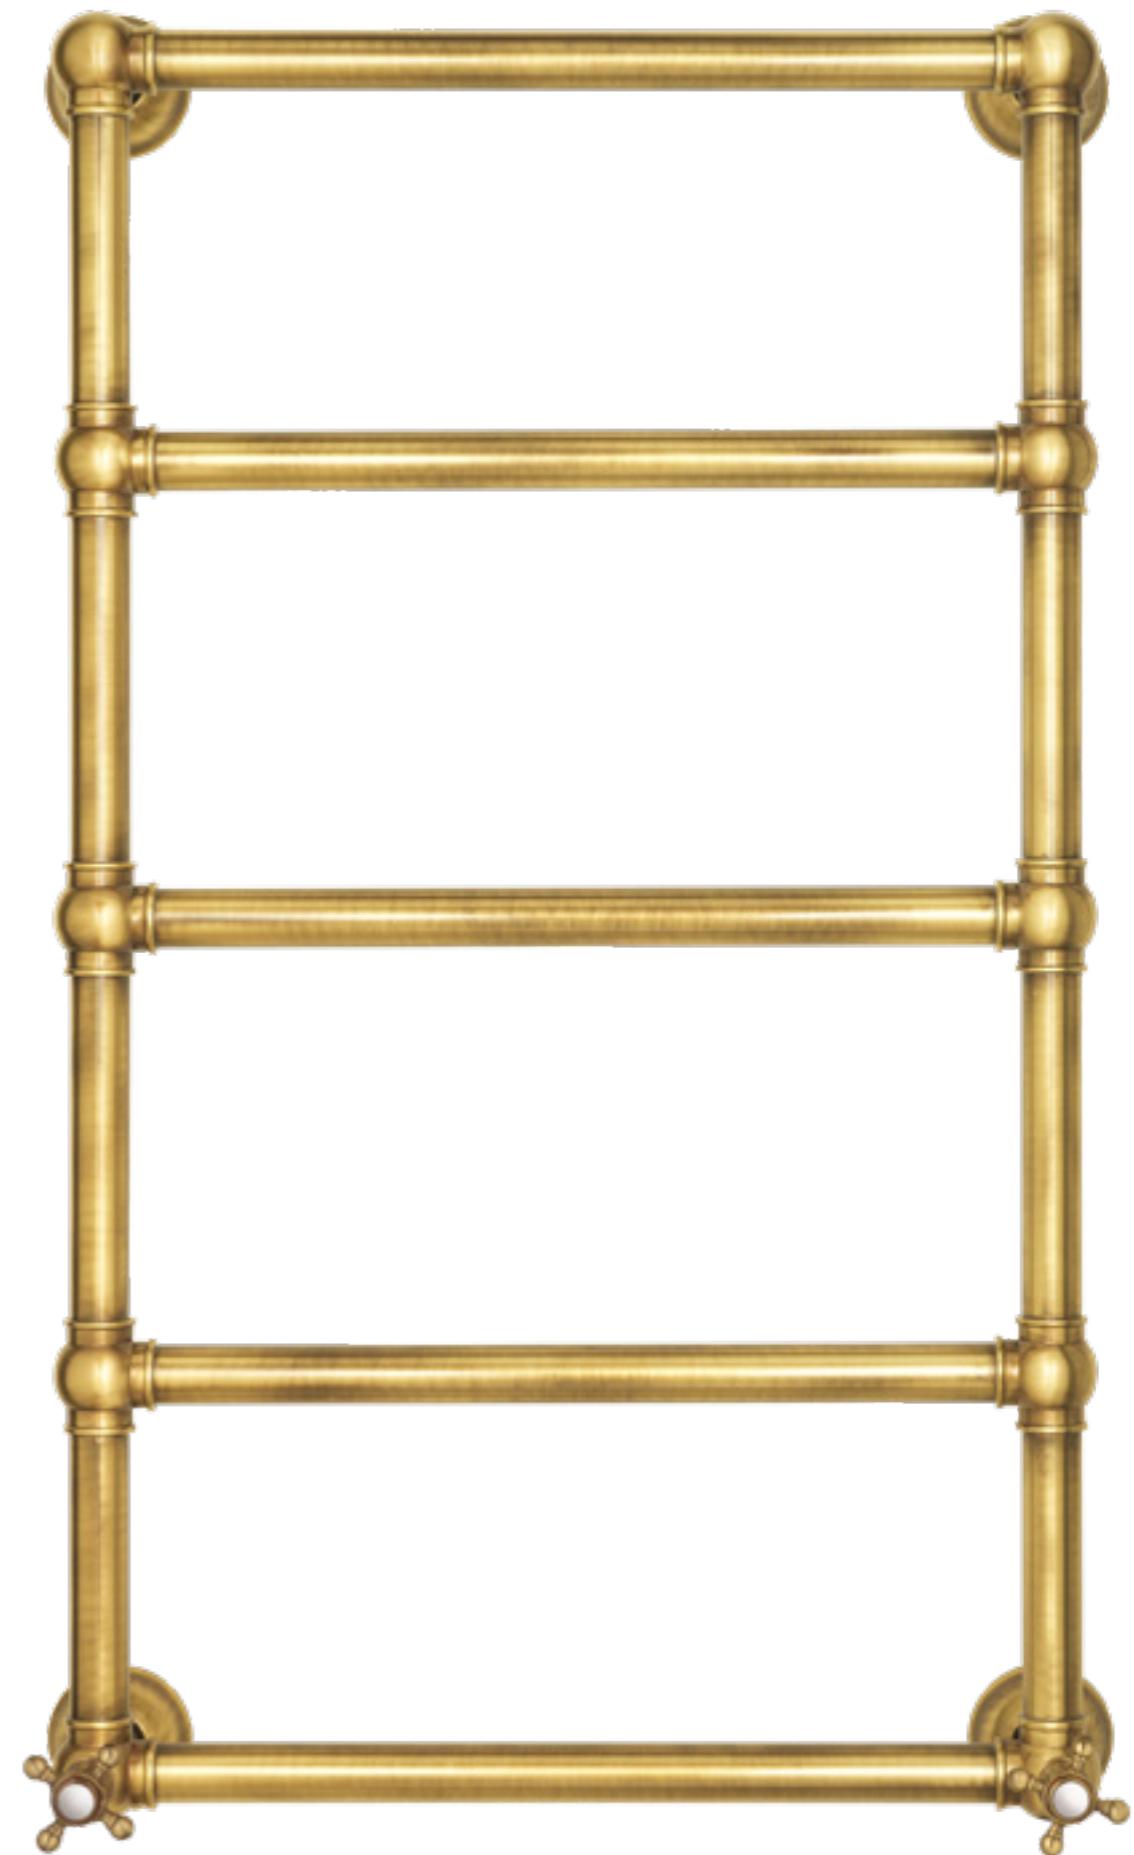

Victoria è un termoarredo dalle forme classiche, nel quale i tubolari dalla sezione importante vengono raccordati ortogonalmente, evidenziandone il punto di intersezione con un prezioso tornito sferico. La presenza delle valvole con manopola a croce, anche integrata, contribuisce alla definizione dello stile.

Victoria is a radiator with a classic design, in which the thick, elegant tubes are joined at right angles, highlighting the joints through the precious ornamental turned spheres. The valves with cross-shaped, integrated handwheel complete the style.

**Valvole | Valves**

Disponibile con sistema elettrico o combinato elettrico/idraulico.

Disponibile con valvole termostatiche.

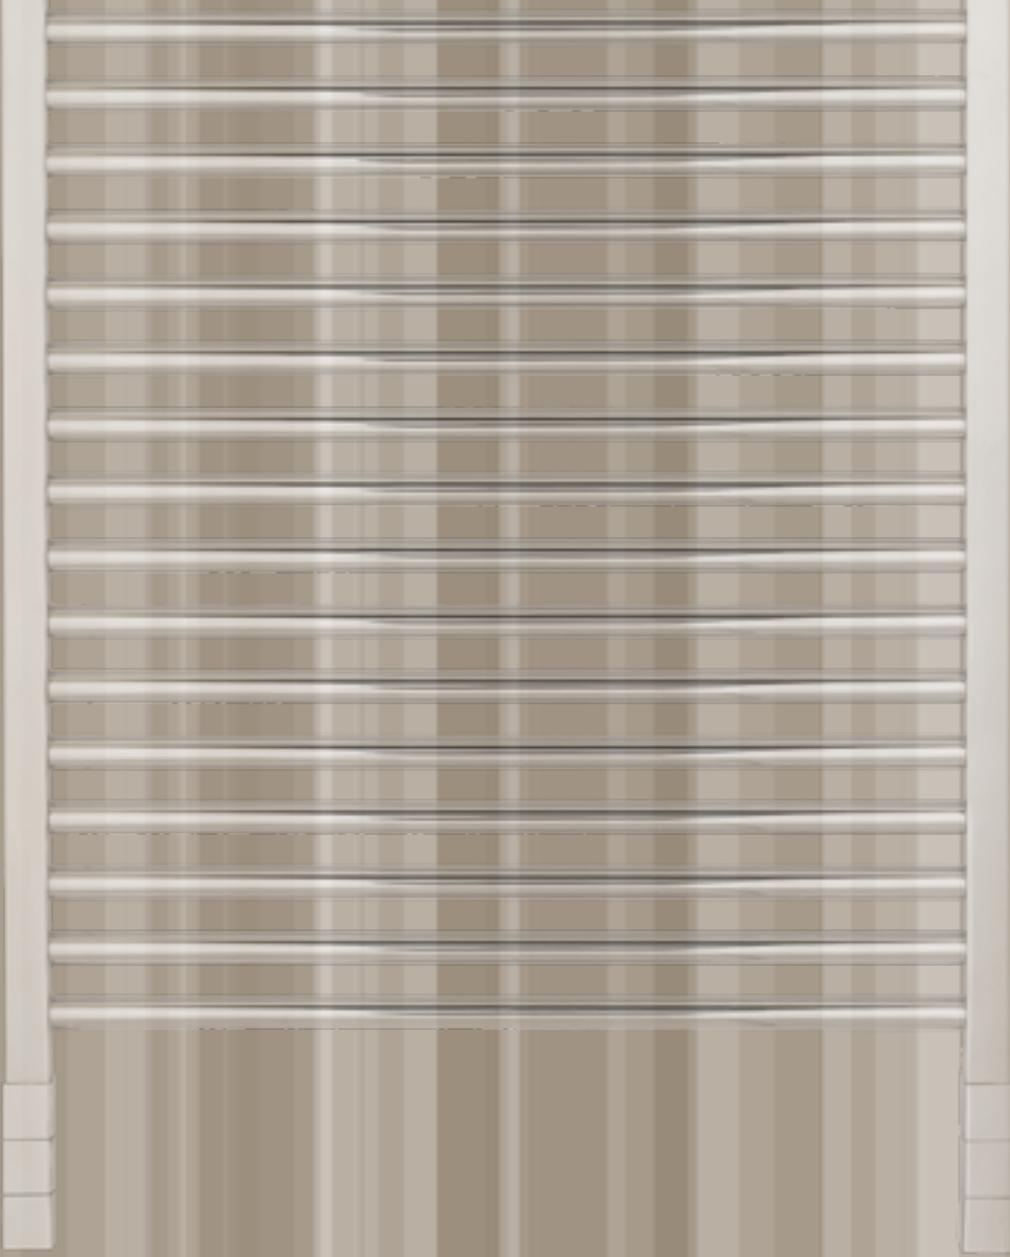

I termoarredi con finitura galvanica e verniciato Bianco vengono forniti con valvole e borchie copritubo della stessa finitura. I colorati vengono forniti con valvole e borchie copritubo Cromo.

Available with electrical heating system only or with mixed electrical/water heating system.

Available with thermostatic valves.

Radiatori con galvanic plating or painted Bianco come supplied with valves and tube-covers with the same finish. Coloured radiators come supplied with Cromo valves and tube-covers.

cod. RE C (cromo/chrome)

Cronotermostato elettronico per scaldasalviette elettrici.  
Grazie al suo sensore interno, permette di impostare la temperatura della stanza compresa tra i 10°C e i 30°C.  
Modalità di funzionamento: Comfort, Boost, Stand-by/Antigelo, Timer12 e Timer24.  
Electronic chronothermostat for electrical radiators. By means of an internal sensor is capable of keeping the temperature of the room between 10°C and 30°C  
Operative modes: Comfort, Boost, Stand-by/Antifreeze, Timer12 and Timer24.

Valvola e detentore tondo combinato  
Round combined valve and stop valve  
cod. TCOM

Valvola e detentore quadro combinato  
Square combined valve and stop valve  
cod. QCOM

Grazie all'utilizzo di queste valvole e detentori,  
su richiesta, tutti i termoarredi possono essere forniti con sistema combinato idraulico/elettrico.  
Thanks to the use of these valves and stop valves,  
all our design radiators can be supplied with a combined hydraulic/electric system upon request.
